Streamliner **STRAWBERRIES**

This new everbearing strawberry has captured the country. Its large size, excellent flavor, and heavy bearing qualities has placed Streamliner at the top. Wonderful for canning. The dark red, jumbo sized berries are also excellent for freezing. Set 100 plants now—enough for an average family—and have lots of berries in 60 days after planting.

PRICES: 25 Plants \$1.75; 100 for \$5.95.

MORRISON

Black Raspberry

THE GIANT NEW BLACK RASPBERRY

Due to popular demand we have available this year a limited quantity of the Morrison black raspberries. This variety is outstanding due to its immense size. It originated in Ohio and the berries are jet black, of fine flavor, and excellent for market or home use. It grows in a vigorous manner and is quite free from any of the diseases common to black raspberries. Its ripening season is about the same as Cumberland. We recommend this variety as being one of the better kinds and if you are planting just a few plants in your garden or even a commercial patch, you should try it. **PRICE: 1 Yr. Plants, 25 for \$2.75; 100 for \$8.45. Additional prices and descriptions on page 2.**

SODUS PURPLE RASPBERRY

This is the leading purple raspberry today. It was introduced by the New York Experimental Station a few years ago and we are listing it because some of our customers have made inquiry for same. The plants are very vigorous, very productive, and very hardy. It ripens shortly after Latham.

PRICES: 1-Yr. Plants Only

25 for.....	\$ 2.75	200 for....	\$15.75
50 for.....	4.75	500 for....	35.75
100 for.....	8.45	1000 for....	65.00

Cultivated BLUEBERRIES

The cultivated blueberry will bring you more cash money per acre than any other type of berry plant that we know of today.

These marvelous berries can be grown on any soil that is moist or damp as long as it has a slight acid reaction. The size of the fruit is remarkably large and the quantity is such that you can't describe them. It is unfortunate that everyone of our customers can't see these fruits in bearing or they would have at least a dozen in their garden. We are offering one year plants at a low price this year and you can get started at a very low cost. **Only 37c each in lots of 100. Further description and price of plants in all sizes on page 5.**

When the Stahelin Nursery was organized it was the declared purpose of the founders to produce the finest and the best nursery stock possible. In this purpose it has never wavered. For thirty years Stahelin's have constantly improved and grown the best nursery stock that science could produce. It is a matter of the utmost regret to Stahelin's that our capacity to grow such fine nursery stock has as yet been unequalled to the demand for same, but if you will order now we believe your order can be filled and once you have received our stock you will find that your patience has brought you a very rich reward.

The grower who plants Stahelin's nursery stock has definite assurance that he is enjoying the finest fruit available anywhere. From this high ideal we shall never change. Our location in a cold section makes our stock extremely hardy. Our sandy loam soil produces a root system unequalled anywhere in the country. Couple all of these facts together and you have a perfect combination. Climatic conditions, soil, and the fact that Stahelin's policy of producing only the best assures you of the highest quality.

C. A. Stahelin

DON'T WAIT TO ORDER

Our customers have been very fine in the past few years in placing their orders early. Please remember that the shipping of strawberry, asparagus and that class of plants depends entirely on weather conditions here. **WE POSITIVELY DO NOT SHIP ANY STORAGE PLANTS.** We will endeavor to fill your order as close to the time specified as we can, but if excessive rain or cold weather hits us at that time of the year there may be a slight delay.

CERTIFICATE OF NURSERY INSPECTION

Michigan State Department of Agriculture—Orchard and Nursery Inspection No. 20.

This is to certify that the nursery stock of Stahelin's Nursery, Bridgman, Michigan, has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant diseases. Fee paid \$59.00.

Chas. Figy, Commissioner,
Lansing, Mich.

Bureau of Agricultural Industry,
C. A. Boyer, Director.

September 2, 1947.

10% CASH DISCOUNT

Orders received during January at the prices quoted in this catalog, **with cash in full enclosed**, are subject to a 10% discount. This amount to be deducted from your remittance. Special prices or quotations by mail not subject to discount. **THIS DISCOUNT NOT GOOD AFTER FEBRUARY 1st, 1948.**

IMPORTANT

All stock listed in this catalog is for the customer to pay the transportation charges, as the weight of nursery stock cannot be determined exactly in advance of shipment.

NOTICE

For approximate shipping charges, refer to the back of our order sheet enclosed with this catalog. Complete schedules and rates, as closely as it can be figured will be found there.

FALL SHIPMENTS

We encourage the fall planting of nursery stock. Plants and trees are dormant then, and when warm weather comes in the spring your stock is ready to commence growing. Nursery stock can't be shipped until it has had some cold weather to harden it up, and fall shipments are usually made after the middle of October. **NO DISCOUNT ON FALL ORDERS.**

C.O.D. ORDERS

We can ship C.O.D. if order amounts to \$3.00 or more at full catalog price, no discount allowed, but 10c on each dollar must be included with your order as a down payment. If order amounts to \$3.00, send 30c with order; if \$4.00, send 40c, etc. You may inspect express shipments before you pay. (Parcel Post not subject to examination.) If satisfactory, pay the agent the amount due.

STAHELIN'S GUARANTEE

All nursery stock you buy from Stahelin's is guaranteed to arrive in first class condition, and be free from disease, if shipped by express or mail. We assume no responsibility for freight shipments. **If for any reason you are not satisfied, we must be notified as soon as stock is received.** As our nursery stock is guaranteed to arrive in a live condition, our responsibility ceases as soon as stock is planted, for we cannot be responsible for weather or other conditions beyond our control. If through error, any stock proves untrue to name, it will be replaced free of charge the following season. At no time are we responsible for more than the original cost of the stock.

Stahelin's BLACK RASPBERRIES

LOGAN EARLY SWEET BLACK RASPBERRY

An Ohio origination. Logan ripens 7 to 10 days ahead of Cumberland, which allows the grower to get on the market ahead of other varieties, giving him an opportunity to make some real money. Produces immense crops of jet black berries, as large as Cumberland. Does not crumble, and the last picking looks as nice as the first. Stands severe weather conditions. A great deal of its present popularity is due to its "disease-free qualities."

PRICES—1 Yr. No. 1 Plants

25 for	\$1.85	100 for	\$ 5.50
50 for	3.35	500 for	21.50
1000 for	\$37.50		

MORRISON GIANT NEW BLACKCAP

This is one of the latest and newest black raspberry plants. It originated as a chance seedling in northern Ohio and has attracted a great deal of attention by commercial growers because of its abnormal size. The plant is an extra strong grower being quite free from the common black raspberry diseases. It ripens somewhat later than Cumberland and has a very dark glossy color. The berries are firm in texture and high in quality. Because of its large size and heavy bearing qualities we believe that the Morrison will probably produce more fruit per acre than any other black raspberry today. The plants are not plentiful and the price is somewhat higher than is commonly asked for the old varieties. However, we believe a trial planting will convince you that they are well worth the additional cost.

25 for	\$2.75	200 for	\$15.75
50 for	4.75	500 for	35.75
100 for	8.45	1000 for	65.00

CUMBERLAND KING OF THE BLACKCAPS

Most popular black raspberry today because of its great size, beauty, its firmness and productiveness. The fruit is the largest of the black raspberry family, often measuring practically an inch in diameter. Cumberland is very hardy, and will stand many degrees below zero without injury. It sets a great many berries, and should be heavily trimmed to get best results. Is a wonderful canning berry, makes delicious pies and jelly. Commands top market prices for black raspberries. Is almost disease free, and very popular because of this quality. Stands severe drought and cold weather conditions well, and is able to grow on almost any soil that is not wet.

Logan

2-YR. BEARING AGE PLANTS

As a great many of our customers desire quick results in their garden, we have produced a few thousand of these large size black raspberry plants to supply this demand. These black raspberry plants are very large. They will run from 18 to 24 inches in height. They will all be branched and they will have a mass of heavy roots. If you plant them carefully everyone of them will live and will produce a partial crop for you the first year. A great many commercial growers are planting this type of plant as it assures them of getting a full crop in two years, whereas the one year plants must be grown three years in the field before they will bear to any extent. We suggest to those that order these two year plants that they cut them back to some extent and not allow them to bear fully the first year.

Stahelin's RED RASPBERRIES

Latham

LATHAM THE FAMOUS LATE RED RASPBERRY

The Latham is a big, late ripening, red raspberry that grows on a very stiff cane and comes on the market at a time when practically all other raspberries are gone. It is very productive; will produce from 5,000 to 7,000 quarts per acre, which is about twice as much as any other red raspberry will produce today. This is a superior variety which does well in all sections of the country. It is adaptable to all sorts of soil conditions, climates, and sections. Cold weather has no effect on Latham, as it originated in Minnesota. It is a great shipping and canning berry because of its wonderful qualities. Produces fruit of large size, fine color and good flavor.

The plants that we offer are of the best quality and will carry double and triple inspection certificates as to being free from disease. Plant them on soil that is disease free and you can continue to keep them this way. Our No. 1 plants are heavy and extra fine selected stock not to be compared with the ordinary run of plants sometimes offered.

PRICES—LATHAM 1 YR. NO. 1 PLANTS

25 for	\$3.25	200 for	\$14.95
50 for	5.40	500 for	33.75
100 for	8.95	1000 for	57.50

SUNRISE THE FINEST EARLY RASPBERRY TODAY

A comparatively new early red raspberry, which we recommend very highly. It starts to ripen in Michigan the latter part of June, about two weeks ahead of Latham, and because of its habit of sending up long shoots from the bottom of the cane which ripen later than the buds at the top, it has an extremely long picking season. Is about the size of Latham, and is a bright red when ripening. Fine textured, juicy; does not crumble, and very firm. Does not require expert attention to grow. Plants are vigorous and bear heavily. Sunrise is easy to pick, easy to sell, easy to grow and to eat.

PRICES—1 Yr. No. 1 Plants

25 for	\$3.50	200 for	\$17.10
50 for	5.90	500 for	35.75
100 for	9.85	1000 for	65.00

WASHINGTON

This is an entirely new red raspberry that originated in the state of Washington where red raspberries have proven to be a very profitable venture. It is a real addition to the commercial red raspberry growers list of fine varieties. It is quite resistant to disease, is very hardy, and the fruit is of excellent quality with a very fine flavor. This variety has one peculiarity in regard to its bearing habits. It bears over an unusually long period. Then shortly after the main crop has been harvested the young canes will start to bloom and put on another crop during the early fall. The fruit has a remarkable bright red color and the all around excellence of this berry should cause it to be tried by a great many of our raspberry growers.

PRICES—1 Yr. No. 1 Plants

50 for	5.90	200 for	17.10	1000 for	65.00

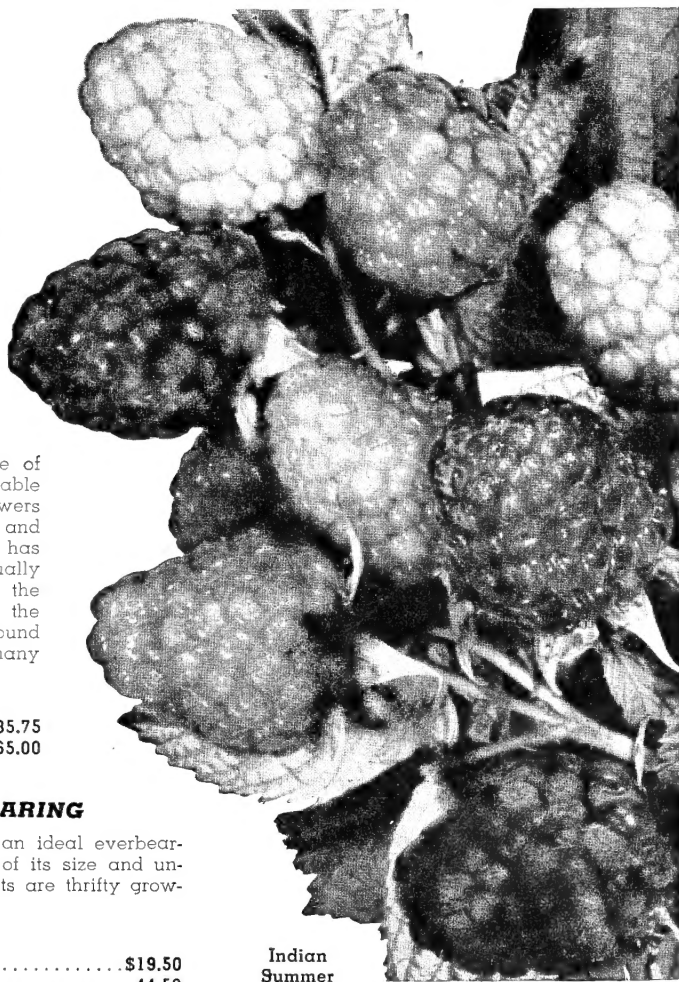

INDIAN SUMMER EVERBEARING

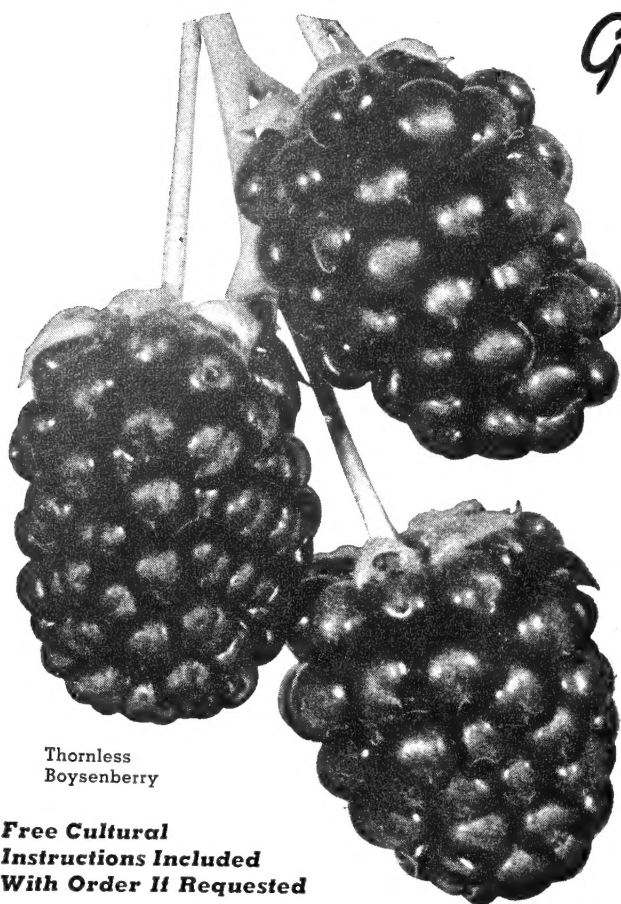

A berry that has beauty, flavor and everything combined to make an ideal everbearing variety. Has marvelous keeping qualities; a sensation because of its size and unusual beauty. Bears a large crop in the spring and in the fall. Plants are thrifty growers, hardy, free of any diseases, and enormous producers.

Indian Summer

Thornless
Boysenberry

Giant THORNLESS- BOYSENBERRY

EARLY RIPENING SEASON

The New Thornless Boysenberry is an off-spring of the common thorny type Boysenberry. It is a sport that has been carefully selected and improved until it is practically free of thorns. It has the same size as the common Boysenberry, often measuring from 2 to 3 inches in length. It ripens 10 days to 2 weeks earlier than the common Boysenberry, which gives it a decided advantage for the grower who wishes to get his berries on the market while prices are at the top. In the selection of plants, size of fruit was also taken into consideration, as well as ripening season, so the new Thornless Boysenberry is regarded as a superior strain of the old. Very highly regarded for culinary purposes.

Thorny BOYSENBERRY

THE LARGEST BERRY GROWN

This variety is of the Dewberry type, and must be placed on a trellis for best results. These dark maroon colored berries often measure from 2 to 3 inches in length.

Boysenberry has a distinctly different flavor, and when allowed to ripen on the vines is much sweeter than any other of the dewberry types. Is very juicy and sweet, and will hang for days on the vines after it is ripe. Is quite hardy, and ripens a few days earlier than the dewberry.

Alfred

BLACKBERRIES ALFRED

It is the most coreless blackberry that we have. It succeeds almost everywhere. Is of excellent flavor, very firm, and the size holds up well to the end of the picking season. Has very small seeds. Hardy, and has withstood 30 degrees below zero. Has long picking season. Ripens a few days earlier than Eldorado. The plant is a very vigorous grower, and at no time has been infected with common blackberry diseases. Its Michigan origination makes it adaptable to all sections. PRICED BELOW.

ELDORADO

Produces a full crop of jet black berries of large size. Has a delicious aroma and flavor. Is an excellent shipper, retaining its rich glossy black color after being picked. Very small core, and is a favorite for canning. Extremely hardy. Most of the fruit is borne on the top part of the plants, and care should be taken when trimming not to cut it back too far. PRICED BELOW.

PRICES—Alfred and Eldorado

1-Year No. 1 Plants

SEE PAGE 1**

RUBEL Late

This variety was one of the first that was offered to the public, and has continued down through the years to be one of the best. Is a parent of many of the present hybrids. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large size fruit, and a heavy bearer. **Priced below.**

JERSEY Midseason

In our opinion, Jersey is superior to some of the other blueberries. The bush is very upright, vigorous and a large producer. The fruit is enormous in size, very attractive, firm and very sweet. We recommend Jersey for home use as well as shipping. **Priced below.**

RANCOCAS Very Early

Is of excellent quality, and a very good shipper. The bush does not grow quite as tall as Rubel, but it produces a lot of fruit over a long picking season. **Priced below.**

STANLEY Early Midseason

A tall vigorous grower. Produces very large berries of excellent quality. Thick shiny leaves. A good variety to plant as companion to Rubel and Jersey. **Priced below.**

From **MAINE** to **TEXAS**

GROWERS PREFER

Stahelin's

STRAWBERRY PLANTS

The state of Maine, being located in the far north, is one state in which we sell a lot of strawberry plants. This northern location makes it almost imperative that they buy plants that are suited to this location; hence the volume of orders we get from there.

The state of Texas, of course being located in the far south, makes it impossible for us to ship there in the spring, but we ship a great many orders to this state in the fall and they are all getting good success with same so far as we know.

Michigan-Grown Plants Finest in U. S.

They say it is poor policy to blow your own horn, but if you don't nobody else will. We know the finest strawberry plants in the U.S. are grown right here in the Bridgman vicinity. We have bought plants in the west, in the south, and in the east. None of these plants which we purchased can compare in any way with the ones we produce here in Berrien County, Michigan. You just can't beat the good, thrifty, heavy-producing, hardy plants grown in Berrien County.

We Invite Comparison

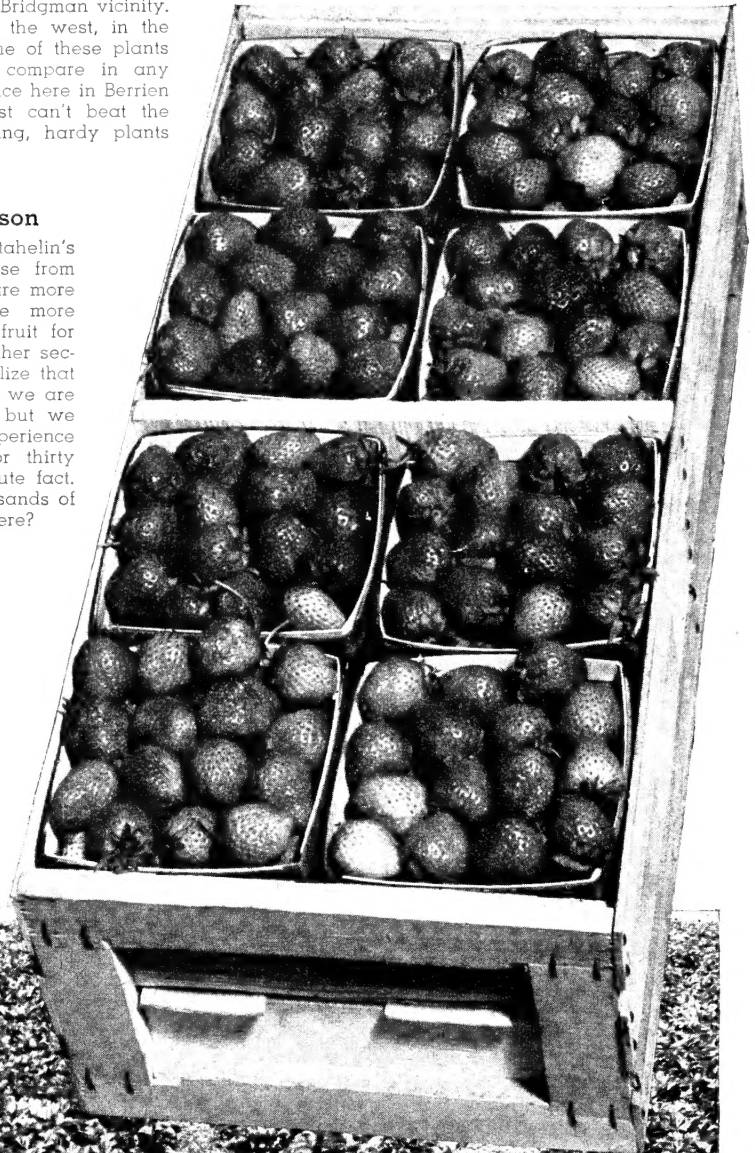

We want you to compare Stahelin's strawberry plants with those from other sections. Our plants are more sturdy, weigh more, have more vitality and produce more fruit for you than plants from any other section of the country. We realize that in making such a statement we are getting into a controversy, but we have found from our own experience of growing strawberries for thirty years, that this is an absolute fact. If this isn't so, why do thousands of people buy plants from us here?

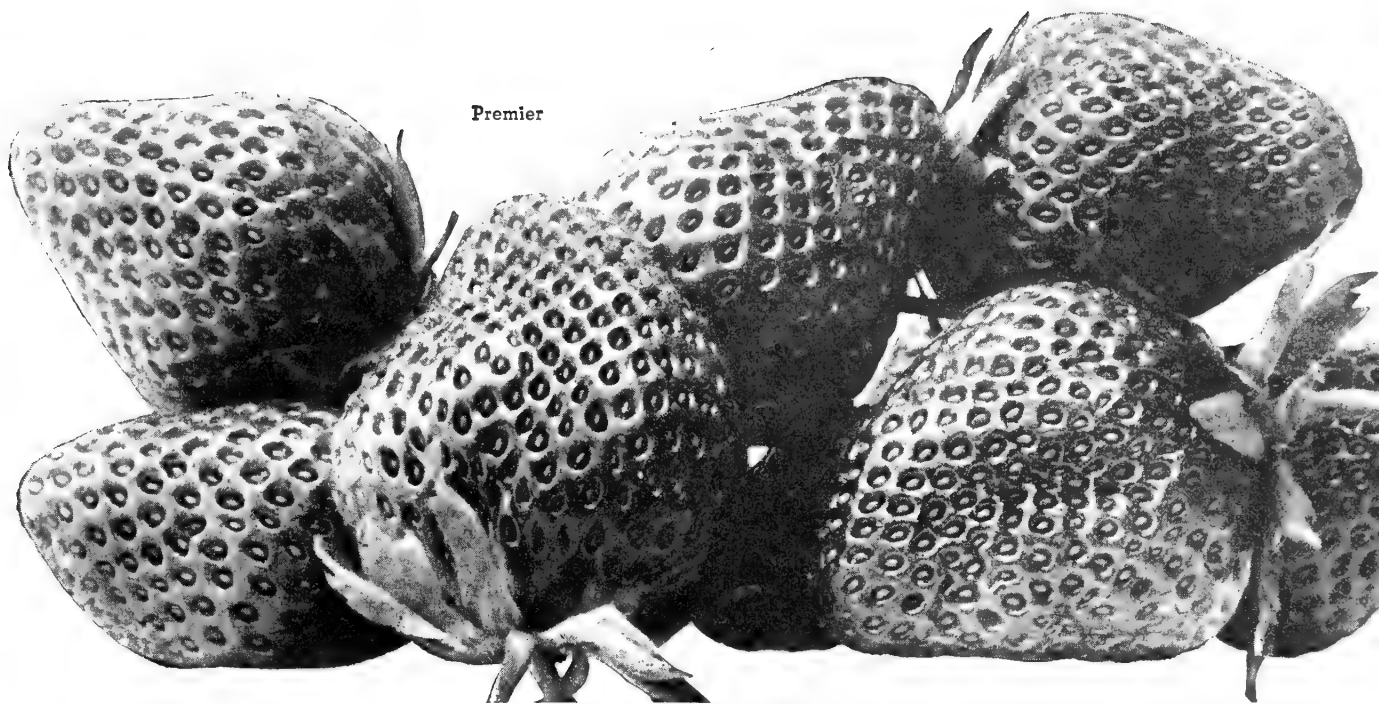

Ideal Climate Produces Disease-Free Plants

Nematode, which is a source of a lot of trouble with a great many strawberry growers, flourishes and grows under hot weather conditions. The nematode can't thrive here in the north due to the extremely cold winters which often get down to 10 or 15 degrees below zero. However, being close to Lake Michigan our weather is tempered by this body of water, thus giving us an ideal growing climate.

The Need for Food Products Is Urgent

Famine and want all over the world are creating a need for an enormous amount of all kinds of products. This need is immediate, so consequently prices cannot possibly come down. They will remain high and thereby assure you a greater profit than ever before. We urge you to buy your nursery stock now.

Premier

Stahelin's PREMIER

**Famous For Its
"Frost-Proof" Qualities**

Excellent Shipper

By means of careful plant selection, which we have been doing for a number of years, we have perfected a strain of Premier that we know will produce more plants per acre than any other strain of Premier. Our Premier is adapted to all soil and climatic conditions. The picking season is long, commencing with the first and continuing to produce large size fruit until the late varieties are practically over. Premier is very easily picked, and easily sold because of their large size.

Frost-Proof

Stahelin's Premier is practically immune to late spring frost and if you are located in a section where such trouble occurs, you can be assured of getting a fine crop if you will plant our Premier. This is due to the peculiar plant growth which it makes, almost completely hiding the blossom and protecting it from severe cold.

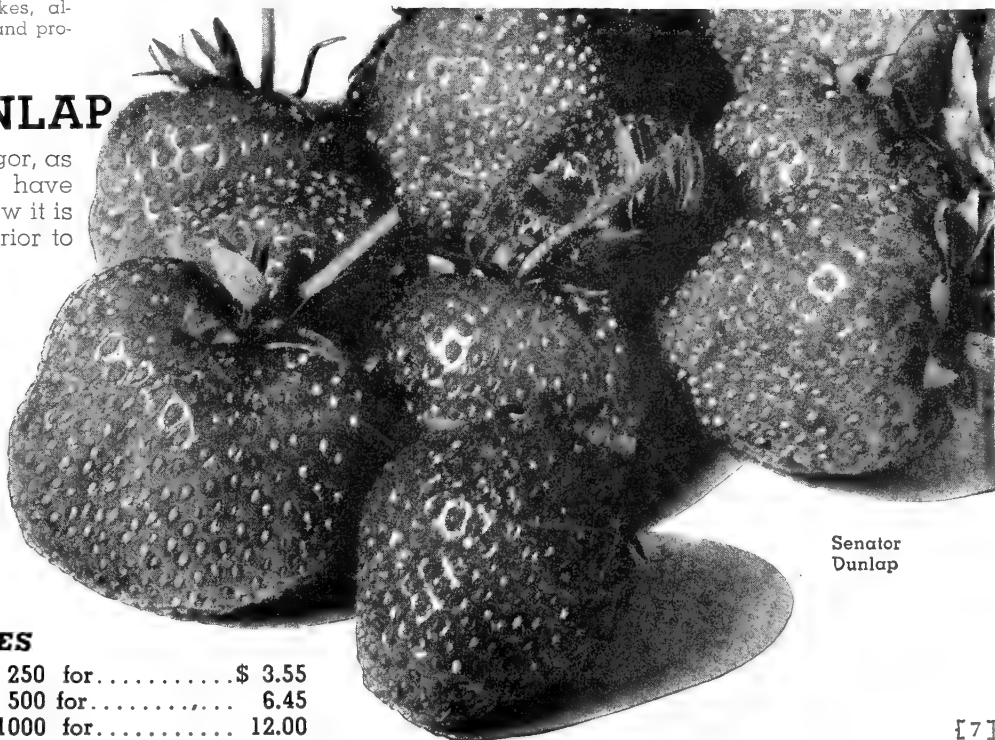

An extremely juicy berry, yet quite firm, making it an excellent shipper. It comes on the market when there are practically no other strawberries. Most of the fruit is pointed, although the berries are of various shapes, resembling most all varieties of strawberries. They are of bright showy red, and have a large calyx. If you want a big crop of fine fruit that will stand a lot of extreme cold weather when they are in blossom and not freeze, plant Stahelin's Premier.

NEW Streamliner

THE PERFECT EVERBEARING STRAWBERRY—FRUIT ALL SUMMER & FALL

CHOICE OF THE NATION

We realize that it is hard to make people know just how good Streamliner is until they have seen it in fruiting. At that time it is fairly ablaze with big, red berries. Big, juicy, sweet as honey berries, and lots of them on every plant. Streamliner is the best everbearing variety that we have seen in the last twenty years, and as we introduced Mastodon to the public in 1923, we believe that we should know something about everbearing varieties. This is the variety to plant for commercial purposes. It has fine color, is very firm, and the quality is equal to any. The New Streamliner has completely taken the country by storm, from the western part of the United States to the east and the south the Streamliner continues to make friends and is rapidly becoming the most popular everbearing strawberry. This is the cause of its high performance, its large production, and the high price it commands on local markets.

Large Size, Healthy Foliage, and Excellent Flavor

Streamliner commences to bear about fifty days after planting and continues to bear the second year as well as the first, which most everbearing varieties will not do. It is extremely sweet and produces berries as large as crab apples. The foliage is quite leathery and very healthy. Free of disease. A perfect flowering variety.

Hardy

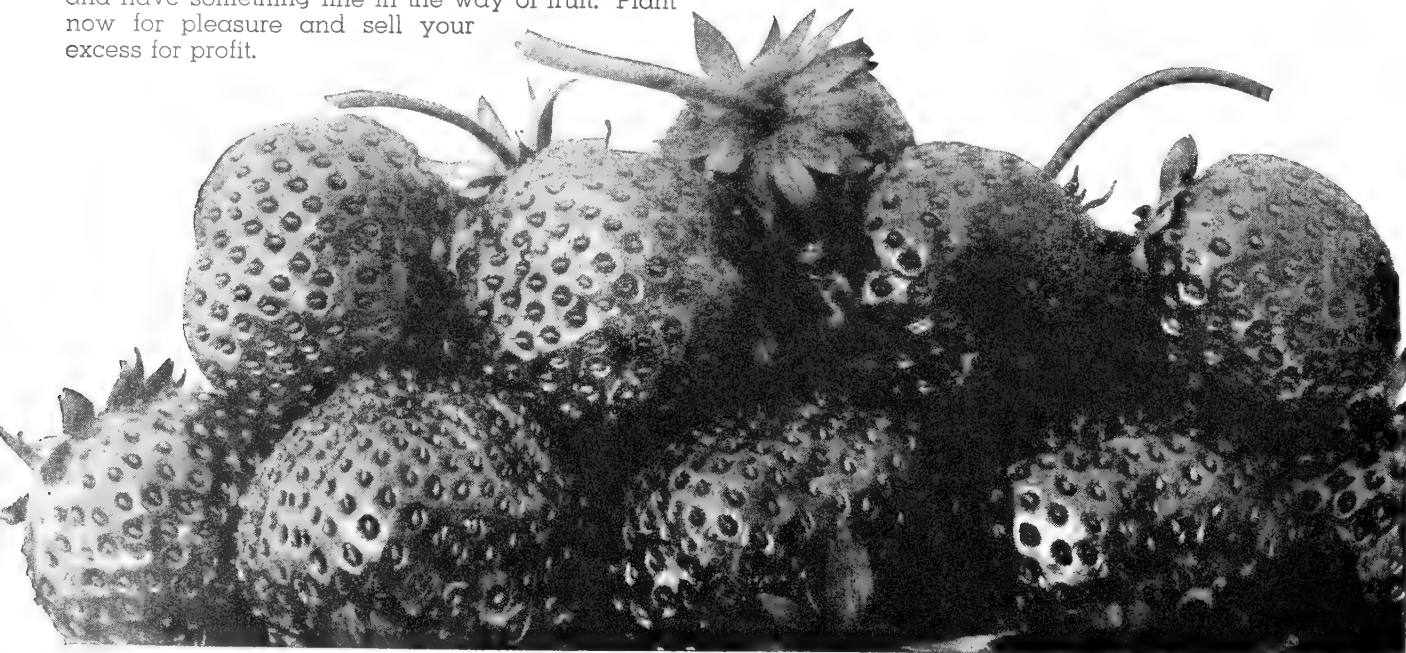

Streamliner is especially hardy, doing well under all weather conditions where it has been grown. Makes plants quite freely. Produces lots of fruit early in the spring and late in the fall when all others are gone. Set this variety in your garden and have something fine in the way of fruit. Plant now for pleasure and sell your excess for profit.

The above illustration shows the Streamliner as it will grow under normal weather conditions. When it is dry, naturally, the plants will not be nearly as thick.

Scarlet • BEAUTY

THE WORLD'S GREATEST STRAWBERRY

Scarlet Beauty will produce more huge, first-class berries than any variety we have ever seen. It has healthy foliage, is an excellent plant maker, and a great producer. This makes Scarlet Beauty the best today.

You Can Tell the Worthiness of Any Variety by Its Popularity

This variety has in the past two years gradually increased in popularity to such an extent that it is selling almost as well as Premier. This shows us that Scarlet Beauty is doing a good job and that the variety is saying just what we said it would do. It produces outstanding berries of large size at a time when the market is bare of other varieties.

Huge Size, Bright Color

Scarlet Beauty produces fruit of extremely large size that is slightly round with a very bright green calyx. The fruit is extremely bright and showy. Stands shipment well as the fruit is solid clear through.

Good Grower and Late Fruiting Season

Scarlet Beauty is a perfect flowering variety which requires no pollinizing. It is the only semi-late berry that will produce as many or more quarts per acre as the Premier. It begins to ripen soon after Premier and continues to produce large size fruit until the season ends. The plant itself is rather small, but is exceptionally long rooted. Produces a fine picking row on soil where some varieties would be a failure. 100 plants should be in every garden in the U. S. We think so much of this variety that we will replace free of charge any plants you buy of this variety, if you are not entirely satisfied after you have fruited them one year.

TEMPLE

The new strawberry that is entirely resistant to all root diseases

This great new variety is a cross between Aberdeen and Fairfax and was produced by the U. S. Department of Agriculture for the purpose of obtaining a new variety which would be resistant to all root diseases and would be adaptable to low ground and wet weather conditions. This variety has proven to be a perfect answer to all of the above demands. It is a very remarkable grower and will survive conditions under which the ordinary strawberry would be a total failure. It is very highly productive. The plants grow unusually tall, very resistant to leaf spot and up to date have shown very little injury from frost and cold where other varieties have suffered severely. It is a good shipper, a heavy yielder, and ripens about the same time as premier and Dorsett. The berries are large, light red, and have a brilliant calyx which presents a fine appearance when picked.

If you have had trouble in the past with wet weather or wet soil conditions damaging your strawberry plants, try Temple. We absolutely guarantee they will grow under conditions where ordinary strawberries would die.

RED ROCKET

NEW ALL RED PEACH

We had originally planned to offer the new Red Rocket peach in a big way in our 1948 catalog. Owing to conditions, we find that we will have very few trees to offer of same this year so that we are devoting this space simply to acquaint our customers with a great new variety rather than to sell Red Rocket trees.

The Red Rocket is a bud sport of Fertile Hale. It is a distinctly different peach in color and flavor, big in size, and it carries an immense amount of color when dead ripe. When ready for shipping or picking it will run about 60% red. It has a very tough skin and tests have proven it to be a wonderful shipper. It doesn't dry rot on the tree to any great extent. It is larger than Hale Haven, more red in color, and ripens from 4 to 8 days after Hale Haven and about 6 days before Elberta. We feel that the Red Rocket comes at a time when you need a peach, between Hale Haven and Elberta. Its quality can't be equalled. Its size is very large and it carries more color than needed. It is a distinctly new variety obtainable only from Stahelin's and offered this year for the first time. The limited supply of trees makes it necessary for us to limit them to not more than two trees to a customer. **PRICE: 1 tree, \$2.95; 2 trees, \$5.00. All trees 3 ft. and up. Not more than 2 to a customer.**

BLAKEMORE

"YELLOWS FREE"

Great Shipping Berry

The Blakemore is by far the best early shipping berry the South ever had. Stands a lot of abuse and neglect in growing, more than any other variety we know of. Produces enormous amount of fruit of fine quality, and will produce this fruit on land where common varieties would be a failure. Desired by canners and cold-pack men. Every Blakemore plant we offer is of the "Yellows-Free" strain. These plants will outbear the common run of Blakemore, and growers should take advantage of this fact.

CATSKILL

THE SUGAR FLAVORED STRAWBERRY

It is now generally recognized as one of the best of the midseason to late varieties. This popularity is due to the fact that it will produce more quarts of large berries than any other variety. It is a sure cropper, as it ranks next to Premier in this respect. It rarely ever freezes. Catskill is bright shiny red, the berries hold their color very well, and when they are carefully packed it presents a very attractive appearance. The foliage of the plant is rich, waxy in appearance, and the fruit is

produced on long picking stems. It ripens when the market is almost bare of fruit, and for this reason always commands a good price.

Everbearing Strawberries BIG RED BERRIES FROM SPRING TO FALL

"SUPERFECTION"

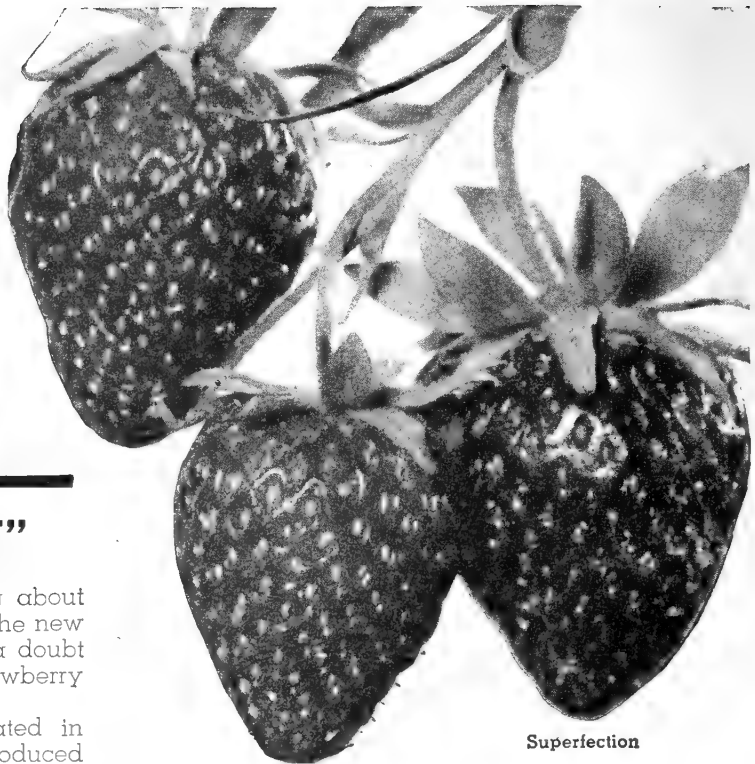

I believe that we at Stahelin's know something about everbearing strawberries and when we say that the new Superfection everbearing strawberry is without a doubt the coming and by far the best everbearing strawberry offered, we mean it sincerely.

Superfection is an everbearing variety originated in northern Michigan by the same man who introduced Gem, Mr. George Keplinger.

Superfection is the best variety to make plants that we have. It is large in size, produces more large berries than Mastodon, has a bright red color, and has a wonderful sweet flavor with just enough of the strawberry tang to make it delicious. At this writing, October 29th, we are picking fine luscious berries, beautiful in appearance, and lots of them. Try 25 of this new wonderful strawberry in your garden. We know that they will be a profitable and pleasant surprise to you. It is entirely self pollinizing.

Superfection

Famous **GEM**

The Favorite Everbearer. Back in 1935 we received under exclusive contract with the originator, our parent supply of this variety. It is the only everbearer that makes plants freely. The berry is dark red, pointed—about the size of Dunlap, of excellent quality, and has a sweet tart flavor. Will commence to bear about 60 days after planted, and will continue to do so all summer and up until cold weather sets in. Can be grown on soil where an ordinary everbearing would be a failure. Plants set in April or May start bearing in July and continue until winter. Bears two crops again next year.

MASTODON

3 Full Crops in 18 Months

So well known to our customers that we are not devoting much space to it. Stahelin's stock is of the original strain well known all over the United States, and is more widely planted than all others combined. Produces a large amount of fruit in the fall when all others are gone. Berries are large, presenting a wonderful appearance, and are easily picked. Should be planted on the very richest and dampest of soil. Perfect flowering. Produces a giant crop 60 days after planting.

GRAPE PLANTS

BIG PROFITS IN GROWING GRAPES

Concord

Seedless CONCORD

The only grape that is practically free of seeds. A beautiful blue-black variety that ripens about the same time as common Concord. Is perfectly hardy. Produces good large bunches that are delicious in flavor. Can be grown in any section where ordinary varieties grow. Prices: 1-yr. No. 1 plants, \$1.05 each; 4 for \$3.95; 6 for \$5.70; 10 for \$8.95; 20 for \$17.50.

CONCORD

Grows on all soils, producing enormous crops of large blue-black berries of highest quality fruit. Highly resistant to drought, insects and diseases. Ripens mid-September. America's leading wine and table grape. Huge 3 yr. plants, 85c each. Other Plants Priced Below.

DELAWARE

Small, compact bunch, sometimes shouldered. Berries are small, red, with thin skin, and unusually sweet. Ripens with Concord. Very hardy, and enormous producer. Long called the standard of excellence of all grapes as a table

delicacy. Priced below.

FREDONIA

A new early black grape, originated and thoroughly tested by the New York Experiment station. Bunch and berries are large with excellent flavor. Ripens fully 10 days before Moore's Early and is an excellent shipper. Priced below.

We grow grape vines by the hundred thousands. If interested in quantity lots, write us.

VAN BUREN

Absolutely new, although it has been thoroughly tested in all grape growing sections. Luxuriant grower, producing compact and well shaped bunches of blue-black color. Exceptionally sweet. Extremely early, ripening 3 to 4 weeks before any other grape is on the market.

Prices: 1 yr. No. 1 plants, 80c each; 4 for 3.00; 10 for \$7.00; 20 for \$13.25.

SENECA

Commonly called the skinless grapes. Golden honey colored, flavor sweet and delicious. Vine is vigorous and very productive. A fine grape for storage.

Prices: 1-yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.

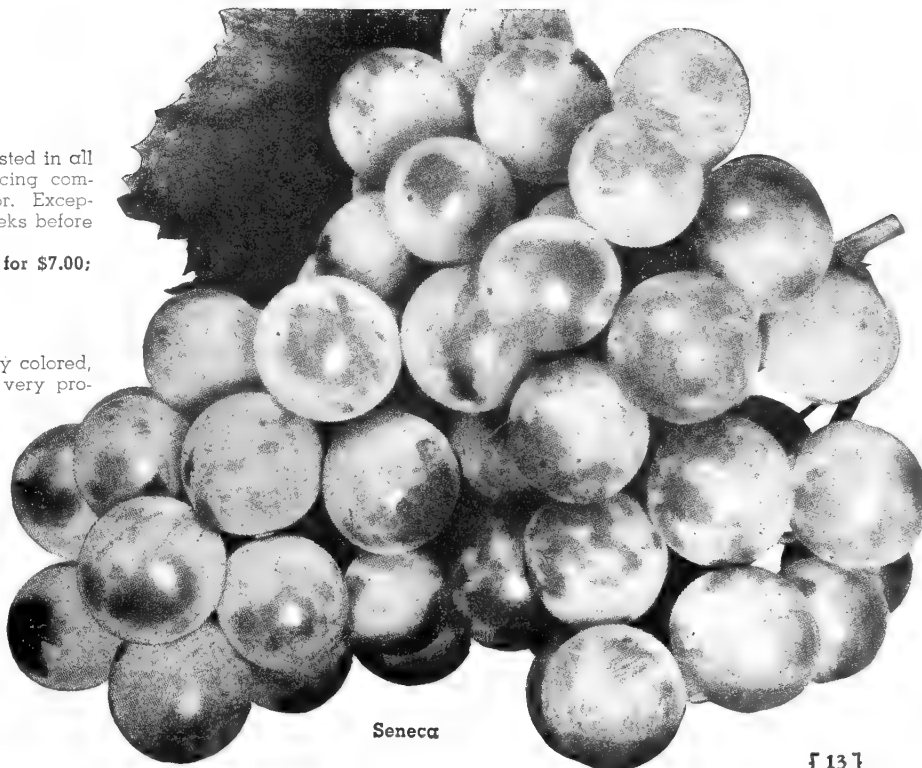

NIAGARA

Leading commercial white grape. More productive than other white varieties. Berries are very large, and bunches compact. The quality of Niagara compares with Concord. Priced above.

GOLDEN MUSCAT

Bunches are of good size, brilliant yellow in color, and have a delicious flavor. Will do well wherever the Concord grows. Excellent shipper and producer.

Prices: 1 yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.

Seneca

Stahelin's Pedigreed ASPARAGUS

New PARADISE

The New Giant Strain of asparagus. It will produce a crop one or two years sooner than will any other known variety today. It is rust resistant, producing stalks of immense size and wonderful appearance. Is easy to grow, and once planted will last from 12 to 15 years with very little care. Paradise is the first asparagus to produce in the spring, and this crop is harvested early when you do not need to be bothered with other things on the farm.

Money-Maker

Paradise asparagus offers you a great opportunity to make money. These fine large rooted plants, produced from expensive pedigreed seed, enables you to buy the world's finest at a cost no higher than for common stock. Grown on special sandy soil, fertilized and dug with special machinery to get the whole root system, we offer you a premium plant at a reasonable cost. Paradise asparagus does not require any special care. We have complete culture on asparagus, ask for it when ordering.

PRICES—NEW PARADISE

We can furnish asparagus in large quantities at attractive prices. Write us for prices.

MARY WASHINGTON

For several years we have listed only the Paradise variety, but due to a demand from some of our customers, we have this year produced a fine crop of Mary Washington plants for those who like this variety. The pedigreed seed that we use produces specimen stock often more than an inch in diameter. It is very crisp and delicious. Wonderful for canning. The heads of Mary Washington are very solid and compact; thus, always commanding a better price than asparagus that has loose heads. This variety is absolutely rust resistant. Grows very fast and comes up exceedingly thick in the row, producing a very heavy crop. Approximately 5,000 plants are required to set an acre. Once planted they last for years, requiring little care. Starts to bear in Michigan in May and continues for about two full months

Kalhaven

KALHAVEN

A Michigan peach which is a result of a cross between the J. H. Hale and the old Kalamazoo variety. Immense in size; its color and flavor is excellent. Very hardy. It is large, round in shape, is a beautiful red color all over, and is an extremely good shipper. Ripens a few days after the common Elberta. The tree is hardy, makes an excellent growth, and is a self-pollinizer. Freestone. **Priced below.**

Stahelin's Hardy PEACH TREES

Sullivan's EARLY ALBERTA

Sullivan's Early Elberta is the new type Elberta peach that is sweeping the peach growing section of the country. The tree is very hardy and it is rapidly replacing the old standard Elberta peach wherever it has been tried, chiefly because of its ripening season which is far ahead of the ordinary Elberta. Ripens 7 to 10 days before Elberta, identical in shape, color, flavor, but is slightly larger in size. Excellent shipper. **Priced below.**

HALE HAVEN

Colors all red long before it is ripe, and retains its richness of flavor over a long period. Is round in shape, very sweet flavor, and ripens about a week before Elberta. Freestone. Is one of the greatest shipping and canning peaches introduced. **Priced below.**

SOUTHLAND

The Southland ripens about 16 days ahead of Elberta. The fruit is freestone, medium to large sized, and round in shape. It is attractively colored with a light red blush covering about one-half the surface at the shipping stage. The flesh is yellow, firm, and of good flavor. Trees are vigorous and productive. This variety is taking the southern peach section by storm because of its extreme beauty. We recommend it to our northern growers to be planted in a small way for trial. **Price: 7/16 Caliper trees only, 85c each; 10 for 7.95; 25 for \$18.75; 100 for \$65.00.**

Haven

Stahelin's Selected

NORTHERN GROWN

PERFECT HALE

A perfect flowering yellow variety. The Perfect Hale will ripen a few days after you have picked your Elberta peaches. This will lengthen your picking season a great deal.

Money-Maker

It is of the Elberta type, although it is nearly round in shape. It has the rich "Hale" flavor, but its quality is about like Elberta, although it is more highly colored. Flesh is exceptionally firm, and richly flavored. Free-stone. Perfect Hale has proved to be one of the best in hardiness, and it produces a full crop of good size perfect fruit every year under extreme conditions, such as drought, etc. **Priced below.**

J. H. HALE

Is extra large in size, round in shape, with a yellow flesh and deeply flushed cheeks. Is highly prized as a canning variety due to its red center. Free-stone and semi-fertile. Should be planted with Rochester or South Haven for pollinizing purposes. **Priced below.**

NOTICE

We cannot ship fruit trees into the following states: California, Colorado, Idaho, Montana, Nevada, Oregon, Utah and Washington.

ELBERTA

No other peach has ever attained the popularity of this variety. Roundish oval in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. Is a yellow freestone, and self-pollinizer. Trees are quite hardy, although they will not stand frost conditions as well as some other sorts. Enormous producer. **Priced below.**

ROCHESTER

A rich flavored, round, orange colored, extra early peach. Its popularity has gained yearly due to the fact that it is a very hardy variety. Is an excellent canner and shipper. The peach is orange-yellow with blazing cheeks, and has a wonderful flavor. It is a fine pollinizer. Should be thinned for best results. Freestone. **Priced below.**

NO STORAGE. STOCK

When you order trees from us you are assured of getting stock that is fresh, and on which the bark will be firm and not shriveled. These fresh trees are far superior to those that are kept in inside storage over winter. Our trees are subject to the coldest of weather all winter outside, and have no protection.

Elberta

The Finest That Money Can Buy PEACH TREES

SCARLET ELBERTA

Ripens a few days earlier than common Elberta, somewhat larger in size, and absolutely hardy. Uniformly yellow fleshed, and its color is blazing bright red. Tree is vigorous, strong growing, and bears young. Sets a heavy crop, but does not require thinning. **Priced below.**

AMBER GEM

THE FROST-PROOF PEACH

A peach that is huge in size, extremely bright red in color tinged with yellow, and a clingstone variety. The tree is thrifty, bears an enormous crop, and is a wonderful peach for canning. Extremely heavy skinned, and the finest shipping peach that we have. Very hardy. **Priced below.**

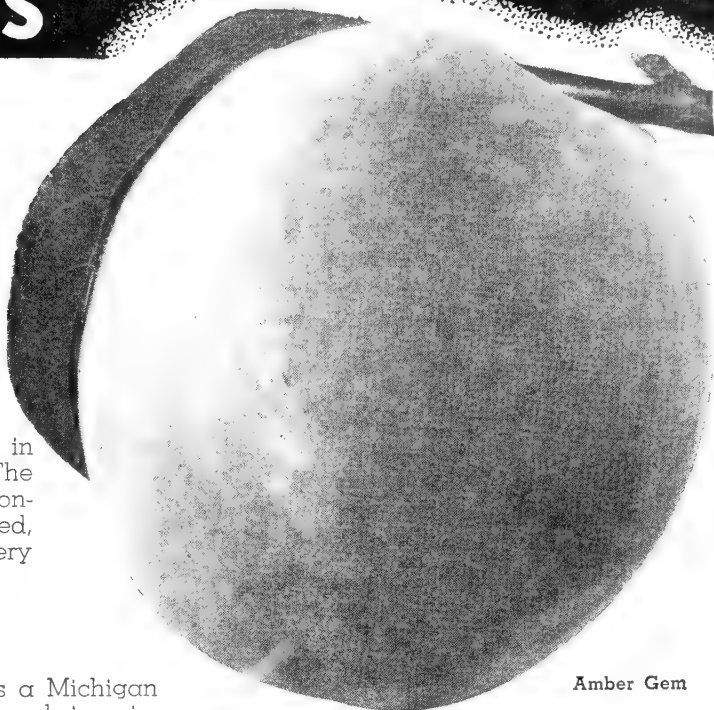

REDHAVEN

EXTRA EARLY RIPENING. The Redhaven peach is a Michigan origination which makes it especially hardy. This peach is gaining popularity and it is being very widely planted because of its extreme high red color. It is one of the earliest, if not the earliest, peach that we have and it carries a very high color long before it ripens so that you can pick it at almost any time that you desire. It is an excellent shipper. The fruit is very firm and easy to handle and it has a brilliant golden, firm textured flesh. It is freestone and self-pollinizing. **Priced below.**

Amber Gem

GOLDEN JUBILEE

Somewhat oblong in shape, and has a brilliant golden color with a slight red cheek on one side. Is golden fleshed, very juicy, and a freestone. Perfect pollinizer and the tree is extremely hardy, producing fruit when other trees will be frozen. **Priced at left.**

**WE ARE GROWERS OF FRUIT TREES
NOT JOBBERS**

Redhaven

WHITE HALE THE GIANT WHITE PEACH

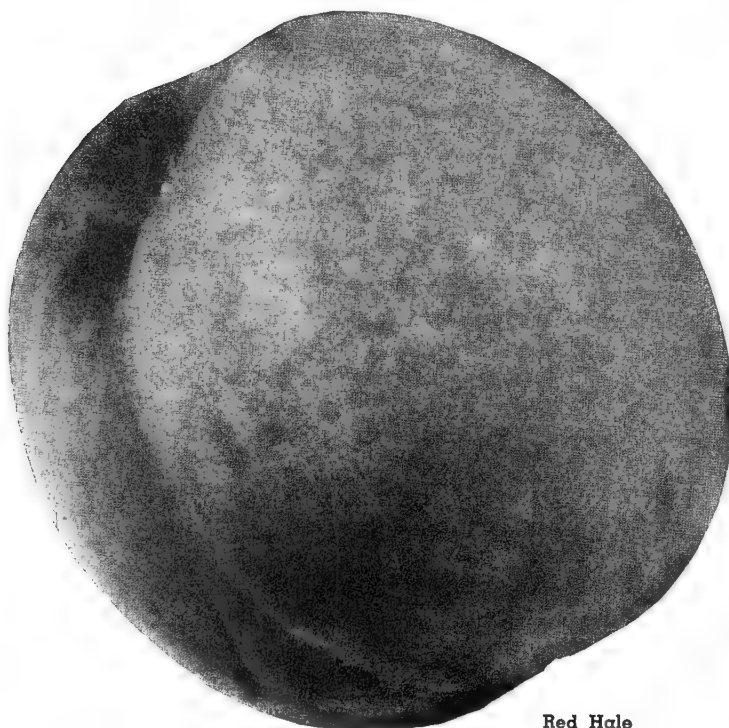

The White Hale is a peach of our own introduction and comes from a bud sport found on a branch of seedling white peach tree grown and produced on our own farm. It is extremely hardy as it has produced a crop of fruit every year since we introduced it in this section. When other varieties are badly frozen the White Hale will produce a normal crop of fruit. The flavor of this peach simply cannot be described. It is honey sweet in flavor and is immensely large in size. It has fair shipping qualities and if you have a roadside trade or a nearby market, this variety will make you a lot of money. Every home should have a White Hale peach tree. Freestone. **PRICED BELOW.**

RED HALE

The Red Hale peach is a bud sport of the old and commonly known "Hale" variety. We can best describe this peach by comparing it to the Delicious apple. The new Red Delicious apple has the color where the old Delicious doesn't have it, and the new Red Hale peach has the same characteristic. It simply has more color than the old common variety. It is enormous in size, has excellent shipping qualities, and its all red color is making this new strain of the Hale variety an excellent peach to plant where you can pollinize with varieties like South Haven or Hale Haven. It is not a fertile flowering variety and should always be planted with another variety for best results. **PRICED BELOW.**

Red Hale

TRADE MARK *Hon-ee-gold* (HONEYGOLD)

This is the new peach which one of our customers named for us. A native of Michigan and a proven variety that has all of the good points and none of the bad.

Large Size

The Hon-ee-gold peach is a marvel in size, being slightly on the round type, 10% larger than Elberta, and ripens very late on the tree. Has a beautiful red cheek and packs up beautifully in the bushel.

Shipping Qualities

As to shipping qualities Hon-ee-gold is the best. In our tests this peach simply does not rot, but dehydrates and virtually dries up before rotting. Skin texture is heavy like Elberta, thus making an excellent peach for shipping.

Flavor

Hon-ee-gold has an excellent flavor, being golden yellow inside with a slight amount of red next to the pit. Somewhat on the dry side, which helps its shipping qualities.

Hardy Trees

The commercial grower should look into the hardiness of any variety he plants for long life. Hon-ee-gold is a very thrifty upright growing tree. Has never winterkilled or shown any winter injury whatsoever here. We want every peach grower to plant one tree this year. Hon-ee-gold has everything that a real peach needs. Freestone. **PRICED AT LEFT.**

NEW *Michigold* PEACH

A huge yellow freestone peach which we introduced four years ago. This peach is so good that it should replace Hale Haven and any other varieties that ripen at that time. Michigold is a semi-early peach. In our orchards Michigold has outsold all early peaches because of its immense size and extremely high color, bringing 50 to 75 cents per bushel more than Hale Haven or South Haven. Absolutely round in shape and for this reason we think it has Hale parentage. A perfect pollinizer. Absolutely hardy and an excellent shipper. While it has a very tough skin, the flesh is golden yellow and very sweet. Try this peach. Your buyers will fight to get them, paying highest prices on the market for them. As a commercial grower of peaches we have found that our new Michigold peach is a variety that will make you more money than Hale Haven, South Haven, or Red-haven. We would be pleased to quote special prices on this variety for the coming year as we expect to have a large amount of these trees available. Up to this time they have been very scarce. **PRICED ABOVE.**

MICHIGOLD

Finest Midseason Peach Ever Introduced. Brilliant Golden Color with Bright Red Cheek. Absolutely Free Stone.

MONTMORENCY CHERRY

Most Satisfactory - Most Profitable

Berrien County, Michigan, is rapidly becoming known as a producer of the finest rooted cherry trees in the United States. The great commercial growers in the cherry sections are all gradually coming to Michigan grown trees because of our climatic conditions here.

Cool weather coupled with an extremely long growing season and light alluvial soil produces a very fibrous root which readily transplants to any type of soil.

The Montmorency is the most satisfactory and most profitable sour cherry tree you can plant. It is the only variety that is planted commercially. It ripens midseason to late and has remarkable keeping qualities after it is ripe. It is preferred 100% by canners and pie makers. Self pollinizing and very hardy.
PRICED BELOW.

EARLY RICHMOND

A variety somewhat similar to Montmorency only it is slightly smaller in size. The trees grow identical, but the Early Richmond ripens a crop and is out of the way before the Montmorency starts to ripen. Self pollinizing.
PRICED BELOW.

Starglow
Apricot

Starglow APRICOT

A VERY HARDY APRICOT, ORIGINATING IN MICHIGAN

This marvelous new apricot is being offered to our customers for the very first time in 1947. It originated in central Michigan and is of very large size, brilliant yellow color, marvelous flavor, and absolutely freestone. This new variety should be planted in every backyard where apricots are desired. The fact that this apricot is a seedling which came up in Michigan should make it especially hardy and late flowering, which is a very desirable feature in all apricots. Starglow apricots will produce a crop of fruit for you where most of the other apricots will fail. Self pollinizing.

PRICE: 7/16 trees, 3-4 ft., \$2.20 each; 3 for \$5.95
9/16 trees, 4½ ft. and up., \$2.65 each; 3 for \$7.80

Stanley Prune

STANLEY PRUNE

THE MOST POPULAR BLUE PLUM TODAY

Stanley Prune was originated in 1912 at the New York Experiment Station from a cross of Grand Duke and another variety. Originating in New York, naturally would make this plum very hardy and up to date it is proven to be the finest commercial blue prune-type plum that we have. It ripens a few days before the Italian Prune and the plums are very large, prune shaped, attractive dark blue in color, with a very heavy bloom. The flesh is greenish yellow, fine grained, and is an absolute freestone. It bears very early and is self pollinizing.

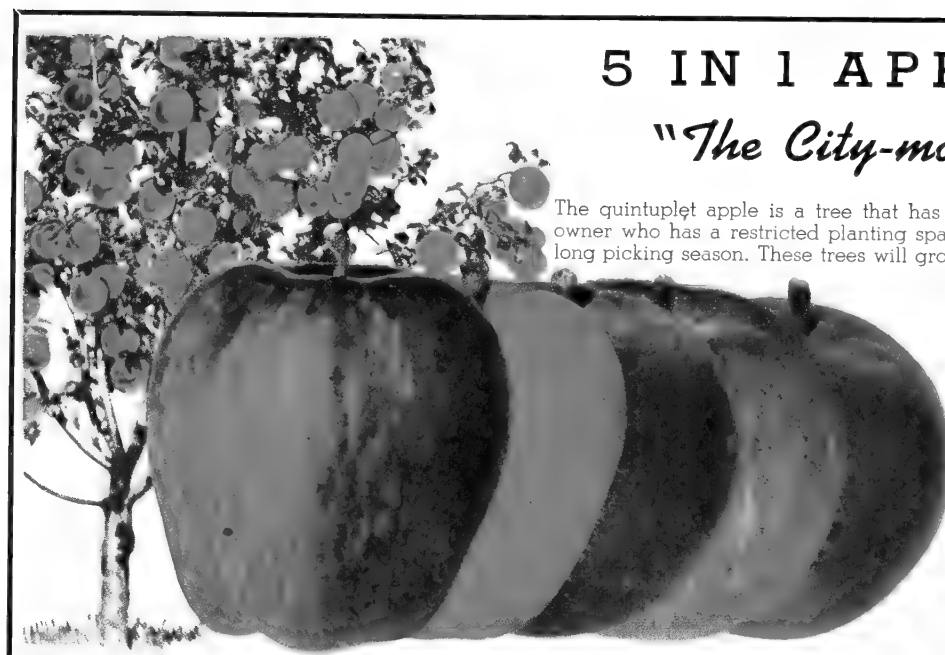

PRICE: 7/16 trees, 3-4 ft., \$1.40 each. Additional prices and description on page 27.

5 IN 1 APPLE TREE

"The City-man's Orchard"

The quintuplet apple is a tree that has been produced so that the small home owner who has a restricted planting space can have a variety of apples over a long picking season. These trees will grow just as large as the ordinary varieties,

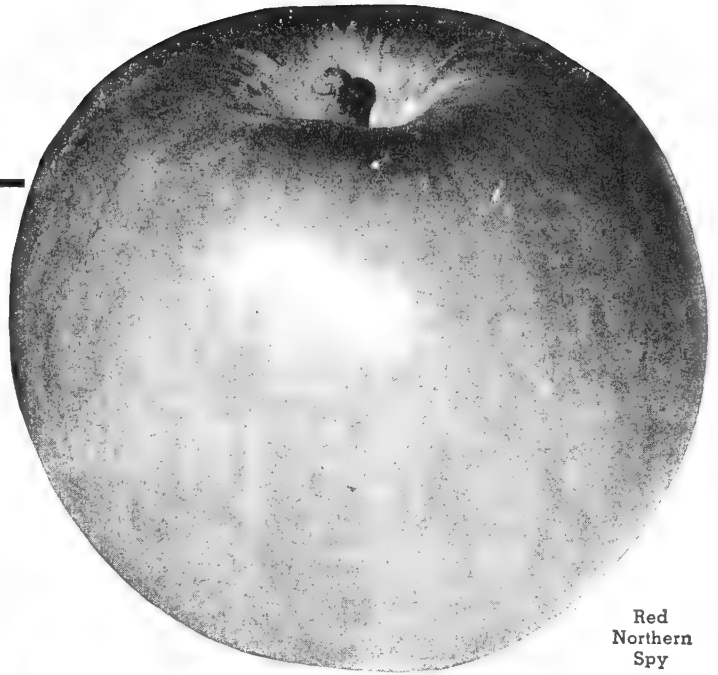

but we have budded some of the best kinds so that you will have a Double-Red Delicious, Jonathan, Stayman's Winesap, Yellow Transparent, and Red June. These are five of the best varieties and they will bear fruit over a long period of time. Not only is this tree a good investment from the standpoint of getting fruit, but it presents a beautiful appearance when in full bloom. The different varieties will bloom at different times and they can be used for ornamental purposes if desired. We have lowered the price considerable which will enable you to plant this tree at a lower price than ever before. **PRICE:** 9/16 trees, \$1.95 each; 3 for \$5.25.

Stahelin's Improved APPLES

RED NORTHERN SPY

An improved strain of the common Spy apple. We have selected it from the best trees we can find so as to get a Northern Spy that will color up early in the fall. Our Red Northern Spy will do this. Very popular for eating, and housewives demand it wherever it can be secured. Flesh is white, tender and sub-acid. **PRICED BELOW.**

Red
Northern
Spy

RED ROME

This variety is sometimes known as Gallia Beauty, but is simply an all-red strain of the old type Rome Beauty. It is very highly prized for baking purposes. Is almost a solid red, and the apple is produced on a tree which is very large in size. Has a white, crisp, delicious flavor, and is one of the very best varieties for winter storage. **PRICED BELOW.**

DOUBLE-RED DELICIOUS

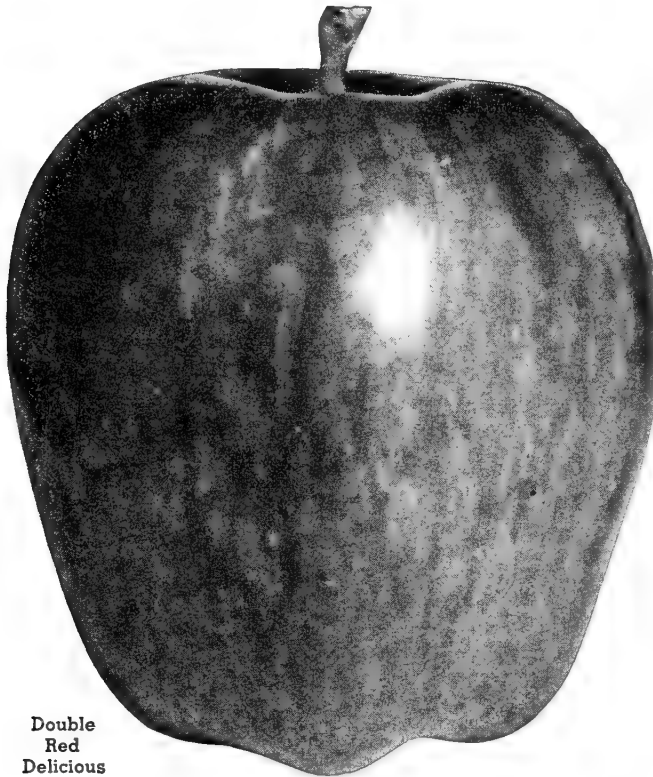

This is the improved type of the common Delicious. The Double-Red, naturally, colors up much more and much sooner than the old Delicious. The tree does well practically all over the United States. It is a wonderful size, is finely fleshed, juicy, and has a sort of sweet flavor with a slight acid taste. Excellent for eating and the most popular fruit for stand purposes. **PRICED BELOW.**

YELLOW DELICIOUS

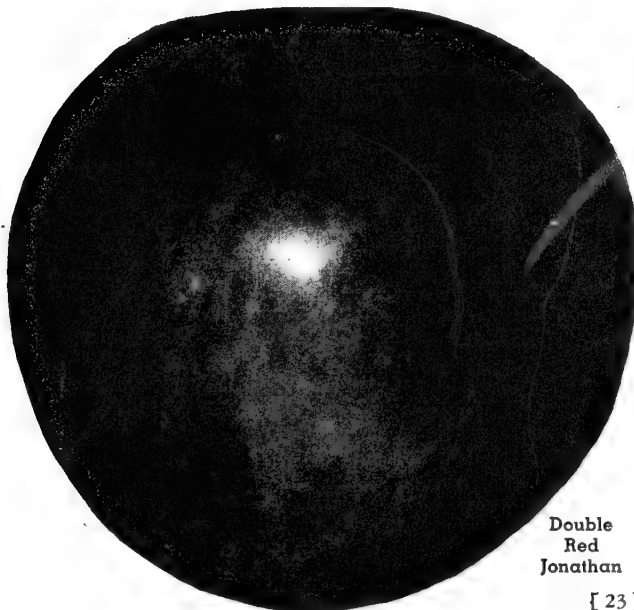

Is identical in shape and size with the ordinary red Delicious, but is completely yellow in appearance. Is sweetly acid in flavor, and the flesh is very firm, crisp and juicy. Is a splendid shipper. The trees we offer are all from parent trees that we selected for extra quality, size and vigor. Popular and profitable everywhere. **PRICED BELOW.**

DOUBLE-RED JONATHAN

Is a solid-red type of the Jonathan variety. It colors up very early in the fall, and enables you to pick your fruit a week to ten days before the common Jonathan will color up. The tree is medium in size, the fruit is firm, crisp and tender. Long lived, productive, and is a very early bearer. A wonderful winter apple. **PRICED BELOW.**

Solid-Red Winesap

Stahelin's **APPLE**

IMPROVED STRAINS

SOLID-RED WINESAP

An improved strain of the old Stayman's Winesap, which gives you a great deal more color early in the season. It is large, round, cherry red, winter apple which is a wonderful keeper. Has a slight sweet acid flavor, and is very popular for eating or cooking purposes. Tree is very hardy and thrifty. **PRICED BELOW.**

GRIMES GOLDEN

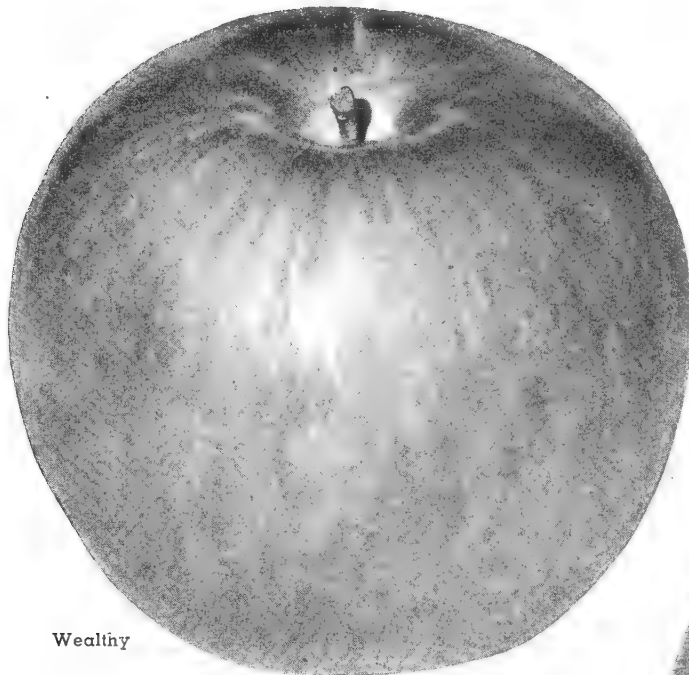

An all yellow apple. Round in shape, medium size, and the tree produces an enormous crop practically every year. It is quite acid in flavor, and is in much demand for canneries or cooking purposes. Quite hardy, and the tree is one of the best pollinizers that we know of. **PRICED BELOW.**

Wealthy

WEALTHY

This is a variety that apparently does well all over the United States, and is one of the few kinds of apples that can be grown in the northwest successfully. It is a fall apple, medium in size, and has a very fine flavor. Much desired for cooking and pie making. The tree is quick bearing, very prolific, and extremely hardy. **PRICED ABOVE.**

CORTLAND

This variety is perhaps the finest of our fall apples. It is a cross of the common McIntosh and the old Ben Davis. It retains all the fine qualities of McIntosh as to flavor, coloring, etc., but it also has the sticking qualities of Ben Davis. It sticks on the tree when the ordinary McIntosh falls to the ground. Extra-large, round apple of beautiful dark red color. Good shipper. **PRICED ABOVE.**

Cortland

DWARF APPLES

The Gardener's Delight

The Dwarf Apple trees are only 10-15 ft. tall at maturity and can be planted 15 ft. apart. The fruit produced is the same as, or larger, than that produced on standard trees. Bear quickly —2 to 3 years after planting. Varieties available are Wealthy, Jonathan and Fameuse.

PRICE: 2 Yr., 2½ to 3 ft. trees, \$2.75 each;
3 for \$7.50.

TREES

QUICK BEARING
POPULAR
VARIETIES

YELLOW TRANSPARENT

This variety is good to eat long before other varieties are ready. Is yellow in color; very crisp, juicy white flesh, and a delicious flavor. One of the best of the early varieties. Tree is very productive; grows rapidly, bears young, and is very profitable. **PRICED BELOW.**

DUCHESS

One of the earliest of summer apples. It is produced on a tree which does not grow to an extremely large size, but is very hardy. An almost round apple of a brilliant yellow color with a slight red cheek. Very popular for pies or preserving purposes. **PRICED BELOW.**

50 or more trees at the 100 rate. Only small size trees available.

ANOKA

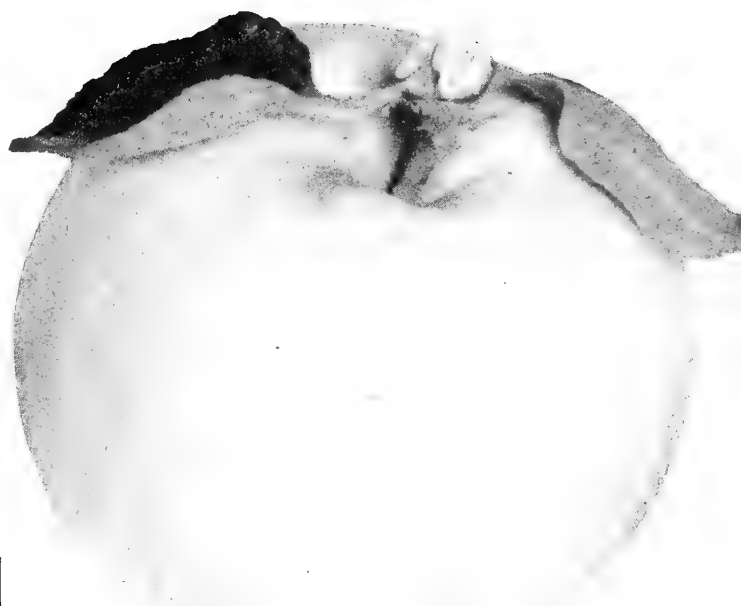

Noteworthy for its hardiness and the beautiful red striped fruit which it produces. Bears very early, often having fruit the second year. Fruit is of excellent quality, ripening shortly after Yellow Transparent. It is more adapted to the northern and central sections than the eastern seaboard belt. **PRICED ABOVE.**

RED MCINTOSH

A superior strain of the old type McIntosh. It is practically all-red all over and retains its color and appearance well after being picked. It sticks to the tree a great deal better than does the common McIntosh. It is a very important Fall apple. Trees are very hardy and start to bear quite young. An exceptionally fine eating apple, of good size, bright red color, and a delicious aromatic flavor. **PRICED ABOVE.**

HYSLOP CRAB

This is the only variety of crab apple that we list, as it is by far the best. Is a real dark purple color - when fully ripened, and has a wonderful flavor. Used by canners for pickling, jelly, etc. Trees produce enormous crops, are long lived, and very hardy.

PRICED ABOVE.

Cope's
Seedless

PEAR TREES

COPE'S SEEDLESS

A seedless variety when grown alone. Planted near other varieties it may cross pollinize and produce seeds. Ripens a few days after Bartlett. Superbly sweet and fine textured. Especially fine for canning and dessert purposes. Trees are thrifty, start bearing when about 3 years old. Yellow skin, slightly pinkish on cheek. **Priced below.**

BARTLETT

The favorite commercial pear. Fruit is very large, juicy, orange-golden yellow in color with a soft blush. It is quite uniform in shape. Favorable for shipping, canning, and eating. The tree is a strong grower, and produces very young. Hardy, and a regular bearer. **Priced below.**

SECKEL

A little red sugar pear. It is richest, highest flavored pear known. Is much desired for pickling and canning purposes. Tree is very hardy. Ripens late September. **Priced below.**

BOSC

A popular pear in California due to its wonderful keeping qualities. A very long-neck pear which is used for boxing purposes, but is highly desirable because of its excellent flavor and shipping qualities. Tree bears young and is hardy. **Priced below.**

FLEMISH BEAUTY

A pear that is absolutely honey sweet in flavor when fully ripe. Is medium to large in size, pale yellow colored with a reddish brown cheek. Flesh is fine grained, juicy, rich and very sweet. Tree lives to a remarkably old age. **Priced at right.**

CLAPP'S FAVORITE

Perhaps the largest of all pears, and always tops the market because of its excellent appearance. It is greenish yellow skinned with a dark red blush. Is quite juicy and sweet. Is a good shipper and the fruit ripens a few days after Bartlett. **Priced above.**

LAWSON

Ever since we have listed the Lawson variety we have never been able to supply the demand. This pear, which is about the same size as Bartlett, ripens fifty days before Bartlett. It comes on the market when there are absolutely no other pears to be had. If picked properly it is very juicy and very rich in flavor. It is golden yellow with a brilliant red cheek. The tree grows to a very tall height and is quite free from blight. If you like pears and want an early variety, Lawson is the one that you should plant. **Priced above.**

DWARF PEAR TREES

We offer a few selected dwarf pear trees this year. These small dwarf trees can be grown in your backyard or anywhere that you are restricted for space. They are small at maturity, bear early, and produce the same high quality fruit as large size trees. Available in Bartlett, Lawson, and Flemish Beauty varieties.

PRICE: 2-3 ft. trees, \$2.85 each; 3 for \$7.95.

PLUM TREES

STANLEY PRUNE

The Stanley Prune plum is without a doubt the finest and most beautiful blue plum that we have today. It is very large, very rich in flavor, and it is hardy in all sections of the United States. It is deep blue in color with a golden yellow flesh and it is absolutely free-stone. The chief quality of Stanley Prune, other than its large size and beautiful color, is that it does not rot on the tree. **Priced below.**

MONARCH

One of the best of the blue plums. It is absolutely round in shape, medium to large in size, and the trees are very hardy. The flesh of the plum is golden yellow; and hangs well to the tree. Excellent for canning. **Priced below.**

YELLOW EGG

A plum that is egg shaped, very large size, and extremely sweet. Prized very much for culinary purposes. Trees grow very large, vigorous, and very hardy. Ripens late August. **Priced below.**

BLUE DAMSON

The most popular of all preserving plums. Extremely high flavored. Turns a rich wine-red when preserved. Small fruit, dark blue in color, rich golden interior. Hardy, prolific, grows 10 to 12 feet high. Very heavy producer. **Priced below.**

Stanley Prune

BROWN TURKEY FIG

Pear shaped fruit of medium size with good quality white shading to pink flesh. Copper brown skin. Prolific and of the dwarf type. Very hardy.

PRICE: 18-24 in. trees, \$1.25 each; 2 for \$2.25.

EVERBEARING FIG

The Everbearing Fig as we have it is very well adapted to growing in the north. Will produce either in the field or in any container in which you may plant it. Produces the first year set out and heavily each year after. Is a good size, sweet, firm, and is an excellent fruit for preserving or eating fresh.

PRICE: 18-24 in. trees, \$1.25 each; 2 for \$2.25.

NECTARINE (Fuzzless Peach)

One of the most delicious of all fruits. Smooth skin like a plum. Has a rich flavor, juicy, and highly prized as a dessert fruit. Nectarines are as hardy as the peach and require the same culture. Fruit is a bright golden color with slightly red cheek. Tree is vigorous and bears young.

Prices: Medium size trees, \$1.95 each; 3 for \$5.40.

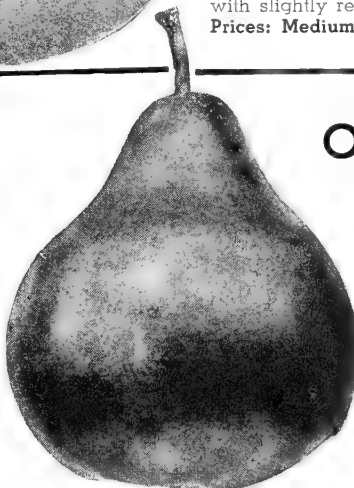

Goldbeck Perfection

GOLDBECK PERFECTION APRICOT

A perfect variety in regards to vigor and hardiness. Very uniform in size, averaging about like a middle size peach; has a delicious flavor. A rich golden colored apricot-yellow, ripening evenly all over. Can be picked tree ripe for shipping. The finest apricot of today. **Prices: 3-4 ft. trees, \$1.75 each; 3 for \$4.45; 10 for \$13.95.**

[27]

ORANGE QUINCE

We list only one kind of Quince, which is the Orange variety. This is a dwarf growing tree which should be planted about 12 to 14 ft. apart. The foliage is very leathery, disease resistant, and quite dark in appearance. Orange Quince is hardy in practically all sections. The fruit is large like a good sized apple, golden yellow in color. This variety is valued very highly for preserving or jelly making. **Price: 2-3 ft. trees, 5/16 Caliper, \$1.00 each.**

Stahelin's Hardy **EVERGREENS**

A Joy for Years to Come

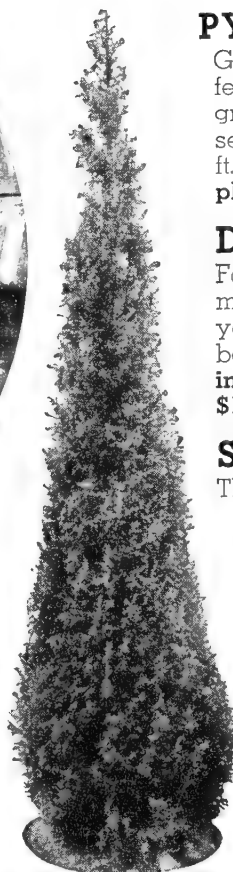

IRISH JUNIPER

A tall columnar type with silvery green foliage. Very erect and slender. Excellent for use at entrances. Reaches a height of 7 to 8 ft. at maturity or can be trimmed to any desired height. **PRICES:** 12 to 18 inch, twice transplanted, \$1.25 each; 2 for \$2.25.

PFITZER'S JUNIPER

Favorite of all spreading Junipers. Low, spreading bush with plumelike branches. Beautiful silvery blue-green foliage. Very hardy and will stand considerable shade. **PRICES:** 6 to 8 inch, twice transplanted, 85c each; 2 for \$1.50. 15 to 18 inch, B&B, \$2.75; 3 for \$7.50.

Irish Juniper

PYRAMIDAL ARBORVITAE

Grows compact and develops into a perfect pyramidal form. Foliage of deep green, and retains its color through the season. Grows to a height of 12 to 15 ft. **PRICES:** 10 to 12 inch, twice transplanted, 95c each; 2 for \$1.80.

DOUGLAS FIR

Fast and tall growing variety. Symmetrical shape with color varying from yellowish green to bluish green. Very beautiful and hardy. **PRICES:** 8 to 10 inch, twice transplanted, 85c each; 2 for \$1.50.

SPREADING YEW

This type of Yew is similar to the Pfitzer. Branches out from the bottom into a low bushy formation. Can be trimmed to desired height or to fit space. Foliage of dark green. **PRICES:** 8 to 10 inch, twice transplanted, \$1.20 each; 2 for \$2.25.

HATFIELD YEW

Grows in columnar, erect form. The color is extremely dark green, the foliage is heavy and luxuriant. Very hardy, easy to grow and does well in shade. **PRICES:** 6 to 8 inch, twice transplanted, \$1.20 each; 2 for \$2.25.

SAVIN JUNIPER

Rich dark green spreading type Juniper. Very similar to the Pfitzer. Ideal for use under windows. Height at maturity, 4 to 5 ft. **PRICES:** 8 to 10 inch, twice transplanted, \$1.20 each; 2 for \$2.15.

BLACK HILL SPRUCE

One of the hardiest of the Spruces. Bushy, compact, and usually symmetrical. Foliage from green to bluish green with branches close to the ground. **PRICES:** 9 to 12 inch, twice transplanted, 85c each; 3 for \$2.40; 10 for \$7.50.

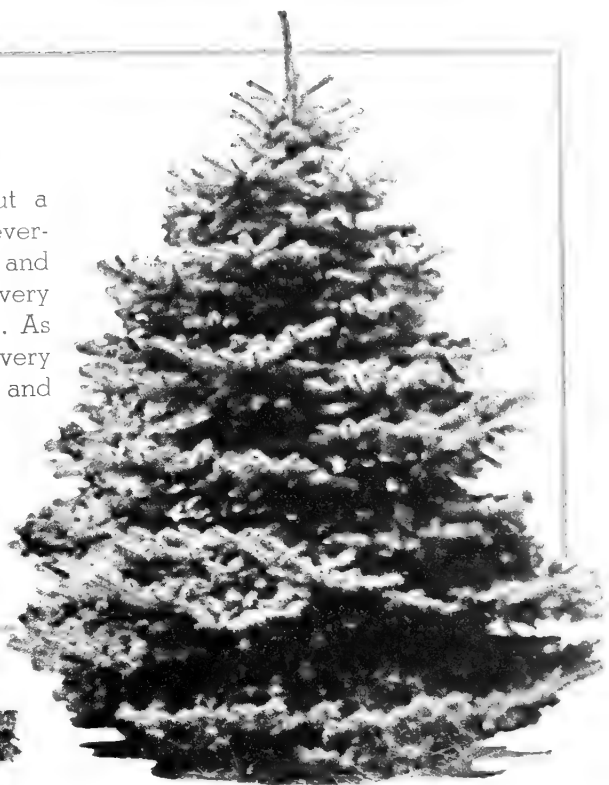

Douglas
Fir

Year Around Beauty

COLORADO BLUE SPRUCE

The Colorado Blue Spruce is without a doubt one of the finest of blue type evergreen trees. It grows to a great height and is an ornamental tree of glistening silvery blue from early spring to midsummer. As originated in the cold section, it is very hardy and is perhaps the most showy and popular of all spruce trees. We have grown an especially fine lot of this spruce, the seeds taken from carefully selected trees so as to obtain the very finest of blue color.

PRICE: 10-12 in., twice transplanted, 85c each; 3 for \$2.40; 10 for \$7.50; 50 for \$35.00.

FRENCH *Lilacs*

One of the finest of all shrubs. Their beauty is so great that it cannot be described accurately. They bloom very young and every year adds to their beauty. Last a lifetime and grow to a height of 6 to 8 feet. During their blooming period they are entirely covered with a profusion of blooms which are extremely fragrant. Available in the following varieties:

Charles Joly. Double flowers of very dark violet purple with silvery reflex.

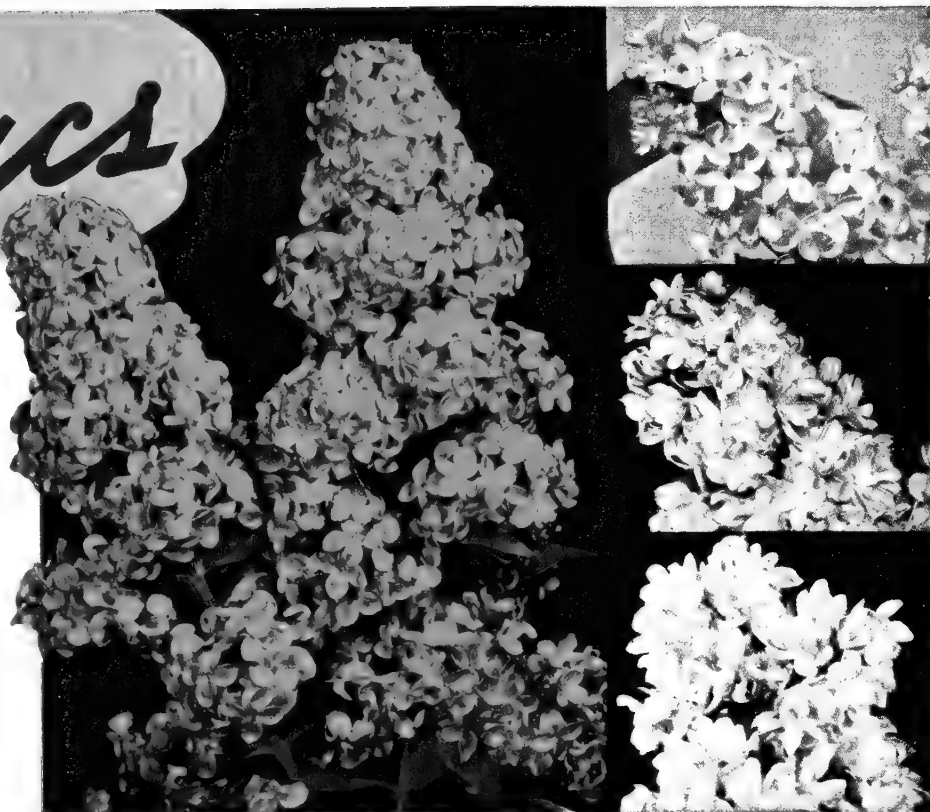

Ludwig Spaeth. Single flowers of deep maroon-red.

Marie Legraye. Large, single creamy white flowers.

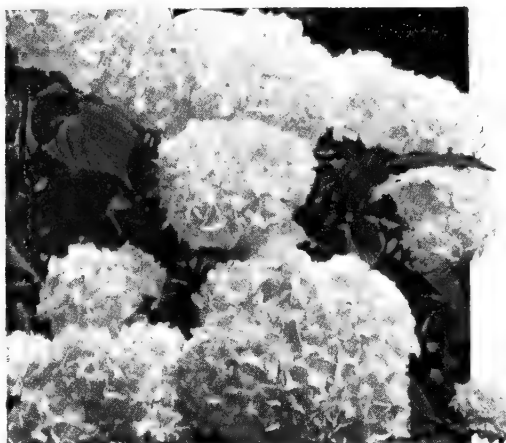

President Grevy. Large semi-double to double flowers of clear delicate blue.

Volcan. A true deep red-purple. Late blooming.

PRICE: 12 to 18 in. plants. Some will be branched, some whips. .95c each; 1 each of 4 colors pictured for \$3.25.

Magnolia Soulangeana

Blue Hydrangea

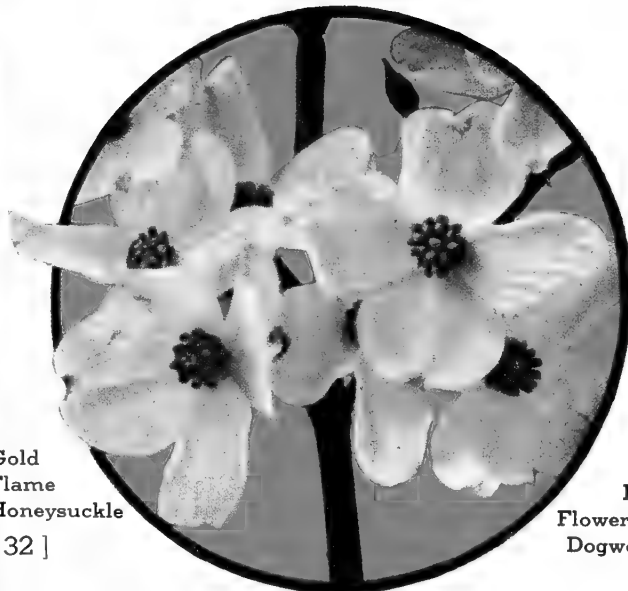

BLUE HYDRANGEA

This is the most perfect of all the Blue Hydrangeas. Does best under acid soil conditions and will grow in 50% shade. At maturity it will be from 2 to 3 feet in height and a mass of solid blue flowers.

Stahelin's HARDY FLOWERING SHRUBS

Make Your House a Home

Before Planting Stahelin's Shrubs

After Planting Stahelin's Shrubs

FORSYTHIA, **Golden Bell**

Every limb and twig is literally covered with golden blossoms before the leaves are out. Flowers often come out before the snow is gone. Glossy green leaves. Very hardy and thrives in any locality. Grows 8 to 10 feet tall and can be trimmed as desired. Often used as hedges, screens, or shrub borders. **Strong field-grown plants, 50c each; 3 for \$1.35.**

HYDRANGEA, **P.G.**

Immense cone-shaped blooms, first white and then turning pink and bronze. Blooms in August with huge panicles, measuring 8 to 12 inches long. Makes a fine winter decoration if allowed to dry on the bush. Can be grown in full sun or partial shade. **Field-grown plants, each 75c; 3 for \$2.10.**

GOLD FLAME **HONEYSUCKLE**

A new superlative variety that is hardy and will grow any place. Large rose-red trumpets, lined with a light to deep golden yellow. Flowers appear in immense clusters the same year plants are set. Exceptionally good for trellises. **Field-grown plants, 85c each; 3 for \$2.40.**

MAGNOLIA **SOULANGEANA**

The most popular and decorative of any of the Magnolias. It is hardy, producing very large rose-pink blooms before any leaves appear in the spring, and which often measure from 3½ to 5 inches across. At maturity they will be from 8 to 10 feet in height. **18-24 inch branched trees, \$2.25 each; 3 for \$5.95.**

RED FLOWERING **DOGWOOD**

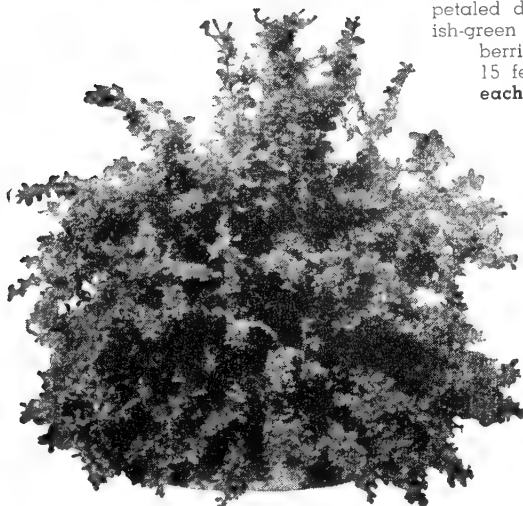

Red buds which open into exquisite four petaled deep pink flowers with yellowish-green centers. Bloom long time. Red berries in fall. Trees grow 10 to 15 feet tall. **18-24 inch trees, \$2.25 each; 3 for \$5.95.**

RED LEAF **BARBERRY**

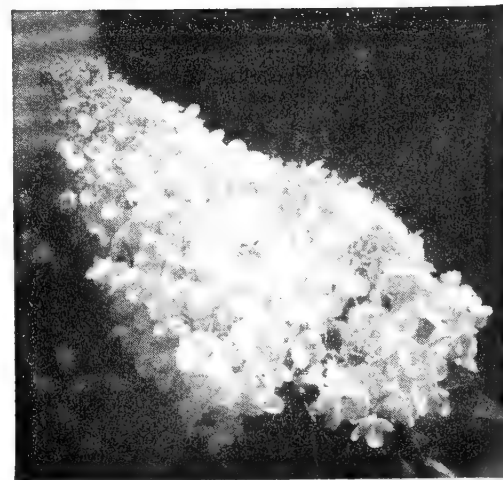

Perhaps the most popular of hedges where the effect of beautiful foliage is desired. Is dwarf-growing, uniformly bushy and rounded in form. Foliage changes with weather conditions; the fall paints the leaves scarlet and loads the branches with countless red berries which remain throughout the winter. **6-9 in. plants, 6 for \$1.10; 25 for \$3.75; 50 for \$6.50; 100 for \$11.95. Specimen plants, 15-18 in., 50c each; 6 for \$2.75; 25 for \$9.75; 50 for \$15.95.**

Stahelin's All Purpose FLOWERING SHRUBS *New Beauty For Your Grounds*

CALYCANTHUS (Sweet Shrub)

An old garden favorite. Fragrant shrub with chocolate colored flowers and shiny green leaves. Blooms from May to October. At maturity attains a height of 8 to 10 feet. An all-season attraction. **Strong, field-grown plants, 55c each; 3 for \$1.50.**

HALL'S JAPAN HONEYSUCKLE

Very strong, vigorous growing Honeysuckle. Produces pure white flowers gradually changing to yellow, which are extremely fragrant. Is an everbearing Honeysuckle, blooming the entire summer. **Field-grown plants, 50c each; 3 for \$1.35.**

MAY DAY TREE

The first tree to leaf out in the spring and the first to bloom. Fragrant trusses of pure white flowers cover the entire plant during April and May. Flowers resemble Lilacs in shape and are lovely for cutting. May be left in bush form or trimmed up and grown as a specimen tree. Flowers are followed by small edible fruit. Grows rapidly and is hardy. **3-4 ft. trees, 95c each; 3 for \$2.70.**

ALTHEA, Rose of Sharon

Large double blooms from midsummer until winter. Ideal shrub for backgrounds or shrub borders. Grows to a height of 6 to 8 ft., well branched from the ground up, or it can be trained into a small tree. Red or white. **Strong field-grown plants, 40c each; 3 for \$1.10.**

BUDDLEIAS

Commonly known as the Butterfly Bush. Bloom profusely and continuously from early summer to frost. Very hardy, the tops die down in winter but come up again in spring and grow from 3½ to 5 feet in height.

Charming. Long spikes, measuring 10-12 inches, of a beautiful pink color.

Ile De France. Rosy purple flowers on long spikes.

Dubonnet. New, rich wine-red with slight purple overcast. Large, well-rounded spikes.

Orchid Beauty. A charming new Buddleia of brilliant orchid color.

Prices all Buddleias, Strong 2 yr. field-grown plants, 55c each; 2 for \$1.00.

MOCK ORANGE

(Philadelphica Coronarius) A tall bush with dark green foliage. Large white flowers appear profusely in June with scattering blooms throughout the summer. Very sweet fragrance. Fine for cutting. Perfectly hardy and can be used for the lawn, foundation planting, or as a screen. Grows 5 to 6 feet tall. **Strong field-grown plants, 40c each; 3 for \$1.10.**

DEUTZIA, Pride of Rochester

An old, popular garden shrub with masses of large white flowers tinged with pink, covering the plant. Blooms in May. Fast growing and will grow to a height of 6 to 8 feet. Makes lovely bouquets. Very free-flowering, and hardy. **Strong field-grown plants, 40c each; 3 for \$1.10.**

Stahelin's ORNAMENTAL SHRUBS OF GREAT BEAUTY

HANSEN'S BUSH CHERRY

Very easy to grow, highly productive, very hardy, and good to eat out of hand. Fruit is plum-shaped, but the size of a sweet cherry. Fruit grows in clusters, and makes a beautiful shrub. Has gorgeous white flowers in the spring, and rich maroon-red leaves in the fall. Thrives on the poorest of soil. Usually comes into bearing the first year after planting. Grows 4 to 5 feet tall. **18-24 in. branched transplants, 45c each; 3 for \$1.20; 20 for \$6.95.**

Pink Honeysuckle

BEAUTY BUSH

(Kolkwitzia Amabilis). Fragrant pink, tubular-shaped flowers are produced in abundance along the entire length of the branches, followed by fuzzy ornamental seed pods which remain all winter. Perfectly hardy, blooms in May. **12-18 in. plants, 75c each; 3 for \$2.10.**

Hansen's
Bush
Cherry

PINK HONEYSUCKLE

Bright pink flowers in spring, followed by loads of bright red berries in the fall. Hardy and vigorous grower which thrives in the shade or in the sun. No special soil required. Well-formed bush which grows to a height of 5 or 6 ft. Can be trimmed as desired. An excellent variety for use as screens, tall hedges, or the background of the shrubbery border. **Field-grown plants, 50c each; 3 for \$1.35.**

HOLLY OR WINTERBERRY

Light green foliage with single white flowers in July, followed by brilliant red berries which line the branches and last well into winter. Useful for Christmas decorations. Grows 6-8 ft. in height. Hardy. **18-24 in. plants, 95c each; 3 for \$2.50.**

WEIGELA, ROSEA

Best known and most extensively planted of the Pink Weigelas. Tall and vigorous growing, with graceful pendulous branches. Large, trumpet-shaped, rosy-pink flowers in thick clusters along each branch. Blooms in June and occasionally blooms the rest of the summer. Excellent cut flower. Grows 4 to 5 feet tall and is useful in foundation plantings. Can be trimmed as desired. **Field-grown plants, 40c each; 3 for \$1.10.**

WEIGELA, EVA RATHKE

An old garden shrub which is always in demand. Free bloomer, starting in June and continuing to bloom at various intervals until fall. Flowers are of brilliant crimson and trumpet shaped. Attains a height of 4 to 5 feet. Good for a foundation planting or border. **Field-grown plants, 55c each; 3 for \$1.50.**

FLOWERING ALMOND

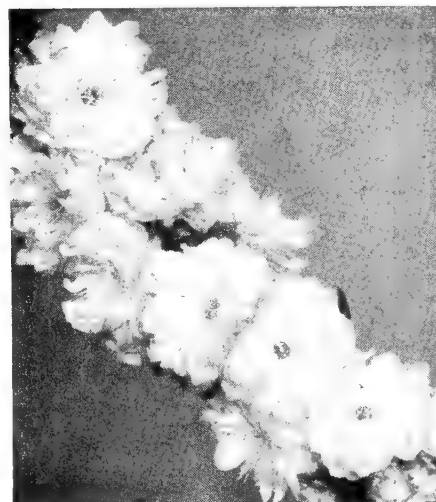

This shrub blooms very early in the spring, even before the leaves appear. Every branch and twig is completely covered from top to bottom with small and very double shell-pink flowers which resemble small roses. Ideal for cutting purposes. Can be grown anywhere and will develop into a round and bushy plant about 3 to 4 feet tall. **24-30 inch plants, 85c each; 3 for \$2.40.**

Weigela, Eva Rathke

Weigela, Rosea

Flowering Almond

STAHELIN'S *Hardy Flowering Shrubs*

VIVID SPRING COLOR

HIGHBUSH CRANBERRY

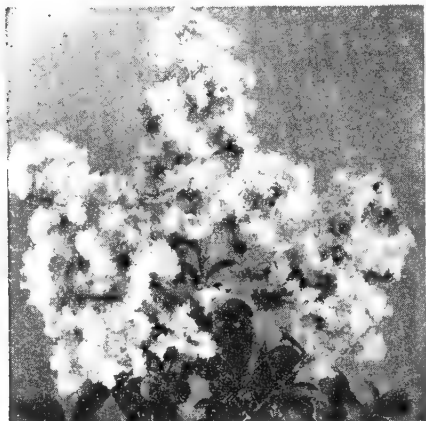

Handsome hardy shrub of upright spreading form, with dense brilliant green foliage. Single white flowers in April and May, followed by clusters of scarlet berries in the fall, which hang on throughout the winter. Thrives anywhere. Grows 8 to 10 feet tall. **Field-grown plants 55c each; 3 for \$1.50.**

FLOWERING QUINCE

(Cydonia Japonica) Produces brilliant scarlet-red flowers with yellow stamens, covering the bush from May until June. May be allowed to grow in bushes or trimmed into hedges. The fragrant yellow quinces make delicious jelly. Grows 6 to 8 feet tall. **Field-grown plants, 55c each; 3 for \$1.50.**

CRAPE MYRTLE

The most beautiful shrub of the South, can now be grown successfully in the North. In northern states, it should be given winter protection by mounding up dirt before cold weather sets in, the same care as Everblooming Roses require. The flowers are of beautiful, clear colors with a soft crepe-like texture. Red or Pink. Please specify color desired. **Selected 12-18 in. Plants. 75c each; 3 for \$2.10.**

Crape Myrtle

PERSIAN LILAC

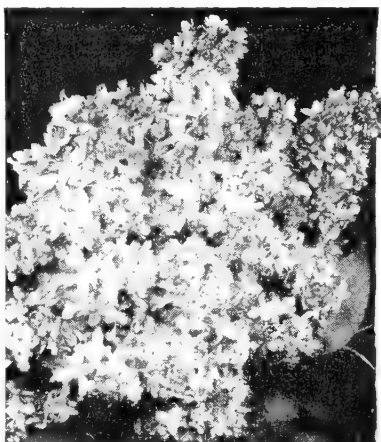

Graceful, drooping branches with small foliage and flowers of bright purple. A great improvement over the common Lilac and preferred by many people as it is a more profuse bloomer. A very popular and hardy shrub. Blooms freely in May and June, and reaches a height of 6 to 8 feet at maturity. **Field-grown plants, 50c each; 3 for 1.35.**

WHITE SNOWBERRY

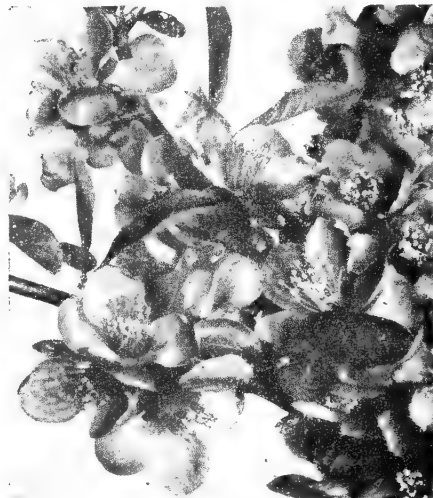

This beautiful shrub grows to a height of about 3 feet and is covered with deep green, velvety foliage. Later on in the season it bears clusters of lovely smooth white berries. Does well in shade. **18-24 in. plants, 45c each; 3 for \$1.20.**

Highbush Cranberry

Persian Lilac

Flowering Quince

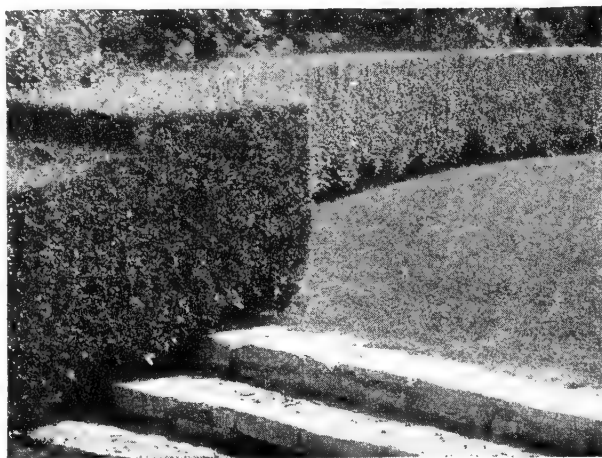

Hardy Ornamental HEDGES

AMoor River PRIVET

Succeeds anywhere, and is perfectly hardy. Has shiny dark green leaves, and they appear early in the spring and remain very late in the fall. Resistant to insect pests, and not subject to blight. **2 Yr. 12-15 in. branched plants, 6 for 85c; 12 for \$1.30; 25 for \$2.55; 50 for \$4.45; 100 for \$7.95. 15-24 in. plants, 6 for \$1.50; 12 for \$2.20; 25 for \$3.95; 50 for \$6.95; 100 for \$11.50; 500 for \$45.00.**

SPIREA VANHOUTTEI

Bridal Wreath. During June its branches are literally covered with delicate white flowers. Beautiful bright green leaves come early and stay late. Very hardy and thrifty. **12-15 in. Well Branched Plants, each, 20c; 10 for \$1.80; 50 for \$6.50; 100 for \$10.95. 18-24 in. Extra-Heavy Plants, Each 25c; 10 for \$2.10; 50 for \$7.75; 100 for \$13.25.**

THIS IS THE YEAR TO PLANT

Stahelin's **HYBRID TEA ROSES**

AMERICAN BEAUTY

Very large flowers of deep pink shaded soft carmine. Delightfully fragrant; one of the best for bouquets. A perennial favorite with rose growers. **Prices below.**

PRICES: 75c each; 3 for \$2.10.

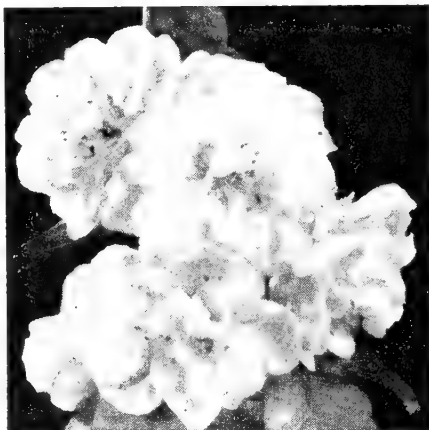

Stahelin's FLOWERING TREES

MOUNTAIN ASH

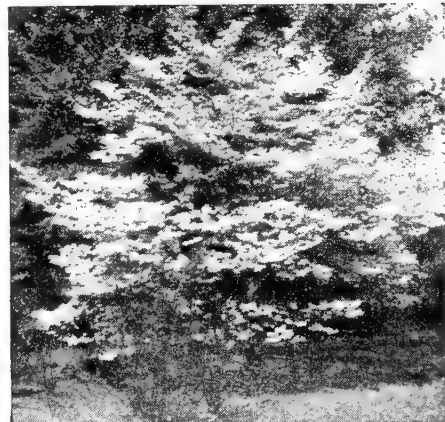

Tree of unusual beauty, with fern-like leaves. Clusters of white flowers in the spring, followed by giant bunches of red berries in the fall. 3-4 ft. trees, 75c each; 5-6 ft. trees, \$1.50 each.

TULIP TREE

Tall, pyramidal, with broad glossy leaves. Bears tulip-like flowers of white with green centers in June. 3-4 ft. trees, 75c each; 3 for \$2.10.

Bechtel's Flowering Crab

White Flowering Dogwood

WHITE FLOWERING DOGWOOD

Large, white flowers with an extra row of center petals. Red berries in fall, also leaves turn red. Grows 10 to 15 feet tall. 3-4 ft. trees, \$1.25 each; 2 for \$2.25.

BECHTEL'S FLOWERING CRAB

A hardy, small flowering tree. Double flowers of delicate pink resemble small Roses. Very fragrant. Ideal for the small lawn. 18-24 in. trees, 95c each; 3 for \$2.65.

Tulip Tree

Mountain Ash

Stahelin's SHADE TREES

WISCONSIN WEEPING WILLOW

Graceful drooping. More slender leaves and hardier than the ordinary *Babylonica*. Rapid grower. 3-4 ft. trees, 75c each; 3 for \$2.10.

GOLDEN WEEPING WILLOW

Has golden yellow twigs with narrow green leaves. Slender branches hang in a beautiful arch to the ground. Hardy, grows fast. 3-4 ft. trees, 85c each; 3 for \$2.40.

CHINESE ELM

Fastest growing shade tree today. Extra hardy and thrives anywhere. Useful for windbreaks and specimen plantings. 3-4 ft. trees, 55c each; 3 or more at 45c each. 5-6 ft. trees, 65c each; 3 or more at 55c each. 7-8 ft. trees, \$1.35 each; 3 or more at \$1.25 each.

AMERICAN ELM

Natural spreading and drooping tree. Favorite tree for street and general planting. Tall-growing, long-lived, and hardy. 4-5 ft. trees, each 35c; 3 for \$1.00.

SOFT MAPLE

Dark green leaves with silvery surface underneath. Speedy grower, and thrives anywhere. Grows tall and makes a graceful, shapely head. 5-6 ft. trees, each 55c; 3 for \$1.50; 10 for \$4.50.

Wisconsin Weeping Willow

LOMBARDY POPLAR

Well known for its tall, slender, upright growth. Rapid grower on any soil. Dark green leaves, lighter shade on the under side. Roots do not clog drains. 5-6 ft. trees, 75c each; 3 for \$2.10.

WHITE BIRCH, EUROPEAN

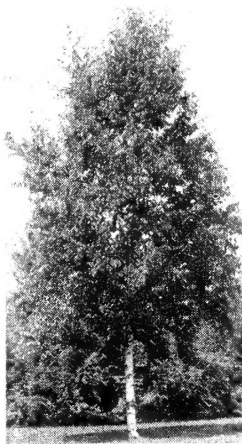

Hardy, tall-growing, upright tree. An excellent lawn tree of distinctive character, its creamy white bark contrasting sharply with its foliage. 5-6 ft. trees, each \$2.25; 3 for \$6.25.

"I must tell you that I received my peach trees in good shape, and they are the finest trees I got this season. I regret that I did not get some more stock from you. I know now that it pays to get fresh dug nursery stock, and shall put your nursery at the head of my list."

WM. P. SULLIVAN, Trumbull County, Ohio.

White Birch, Er.

Lombardy Poplar

Soft Maple

American Elm

Hardy ENGLISH WALNUTS

NORTHERN GROWN, THIN-SHELL

Plant Nut Trees for Profit, Beauty, Shade and Pleasure

The Hardy English Walnut as we have will grow in practically any type of soil that is not excessively wet. Their hardiness and rapidity of growth, their long life and beauty, and finally their timber makes them very desirable and interesting for those that have a little room in which to plant trees. They require no special care and they add greatly to the value of any property on which they may be planted.

The Hardy English Walnut which we have is the result of many years of experimentation and of guaranteed proven quality. Extensive plantings have been made in many midwestern states as well as the states below the Mason and Dixon line. All have proven successful.

The English Walnut is ornamental, and does not look like any other tree. It gives an abundance of shade and like many other trees is not always fertile. Therefore, we suggest that more than one

should be planted for cross pollination, and guaranteed success. This is a tree that we personally think everyone should plant. They are not common. They excite much interest. They are beautiful in appearance, make a lot of shade, and will produce a fine crop for you when the ordinary shade tree produces nothing.

CULTURE:

Plant immediately upon arrival. Don't expose roots. Use good top soil to fill in and see that it is thoroughly worked in and under the roots leaving no air pockets. Don't plant too deep. The natural ground line on these trees is between 2 to 5 inches above the top of the roots. Trim your tree, cutting back all branches to within 3 buds of the main stem and remove the top half. No spraying is required.

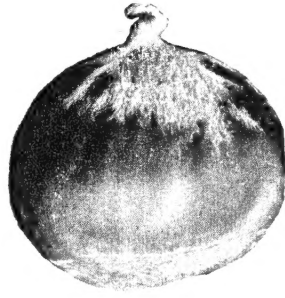

PRICE: 2½-3 ft. trees, \$2.75 each; 2 for \$4.95; 5 for \$11.25; 3-4 ft. trees, \$3.50 each; 2 for \$6.45; 5 for \$14.95.

Chinese

CHESTNUTS

The Chinese Chestnut is the only Chestnut that we know of that is blight resistant. The seed from which our trees are grown are all collected from trees that are known to be true blight resistant and so isolated that the pollen from other Chestnut trees cannot mix with them. We offer these trees in two sizes, 2-3 and 3-4 ft., and both will be very well rooted but by buying the large size trees you will save several years time and they will come into bearing that much quicker.

PRICE: 3 yr. 2-3 ft. trees, \$1.75 each; 3 for \$4.50; 4 yr. 3-4 ft. trees, \$2.25 each; 3 for \$5.95.

Chinese Chestnut

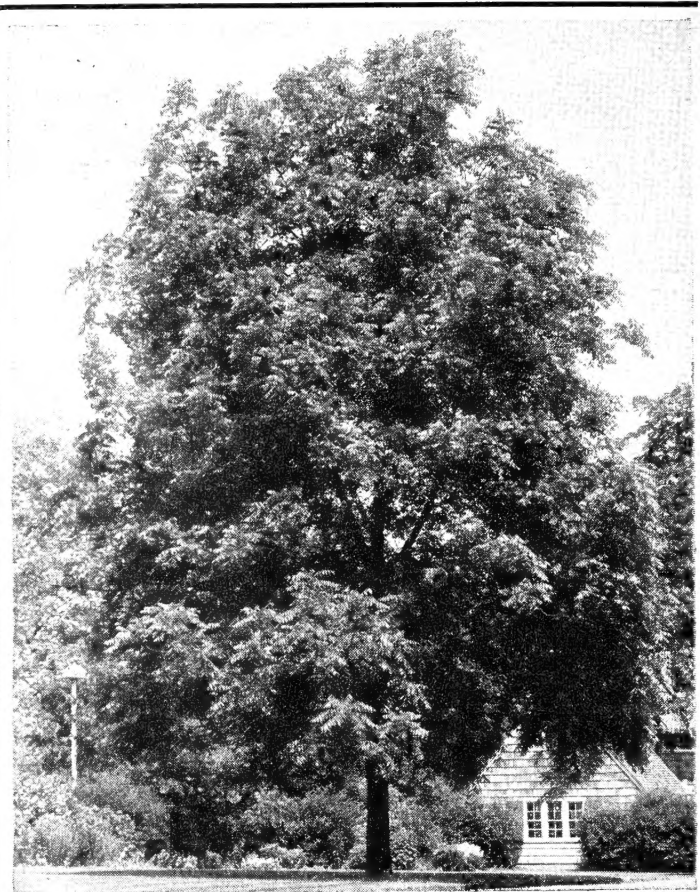

BUTTERNUT

This native nut tree grows in almost every section of the United States. Attains large size at maturity. Starts to bear very early, about 3 to 5 years of age, and will produce a crop annually. The native Butternut is a conical shaped nut that is very nutritious, carrying a very large amount of oil. It grows very easy. It makes an excellent shade and you can plant them in any corner or other sections where ordinary trees cannot be produced, as they require no spraying.

Prices: 2 yr., 2-3 ft. trees, 65c each; 3 for \$1.50; 10 for \$4.25.

Butternut

Black Walnut, Tree and Nut

BLACK WALNUT

Stahelin's Black Walnuts are grown from seed produced on our own farms from the Thomas, Stabler and Weir varieties. While not as thin shelled as the nuts from the cultivated trees, they are excellent and you still have a better Black Walnut.

Prices: 2-3 ft. trees, 65c each; 3 for \$1.50; 10 for \$4.25; 3-4 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

"Trees arrived today in fine shape. Your trees are the best I have ever seen."

J. W. Lloyd, Portage County, Ohio.

Hardy ENGLISH WALNUTS

It has only been in recent years that these Hardy English or paper shell Persian Walnut trees have been available. These trees grow in many parts of the world; the hardest being found in Poland and the Northern Carpathian mountains where the temperature drops to much below zero. The nuts from these trees will vary in size from that of the California English Walnut to three times that size. They fall free of the hull. In Canada where our trees had their source, this variety has been a very heavy producer and thousands are now growing in many of the northern states. Further description and prices on opposite page. **PRICE:** 2½-3 ft. branched trees, \$2.75 each.

The English Walnut trees which we offer are of such size that they readily transplant. Smaller trees quickly catch up with, and outgrow the large size trees when moved and the cost is much lower

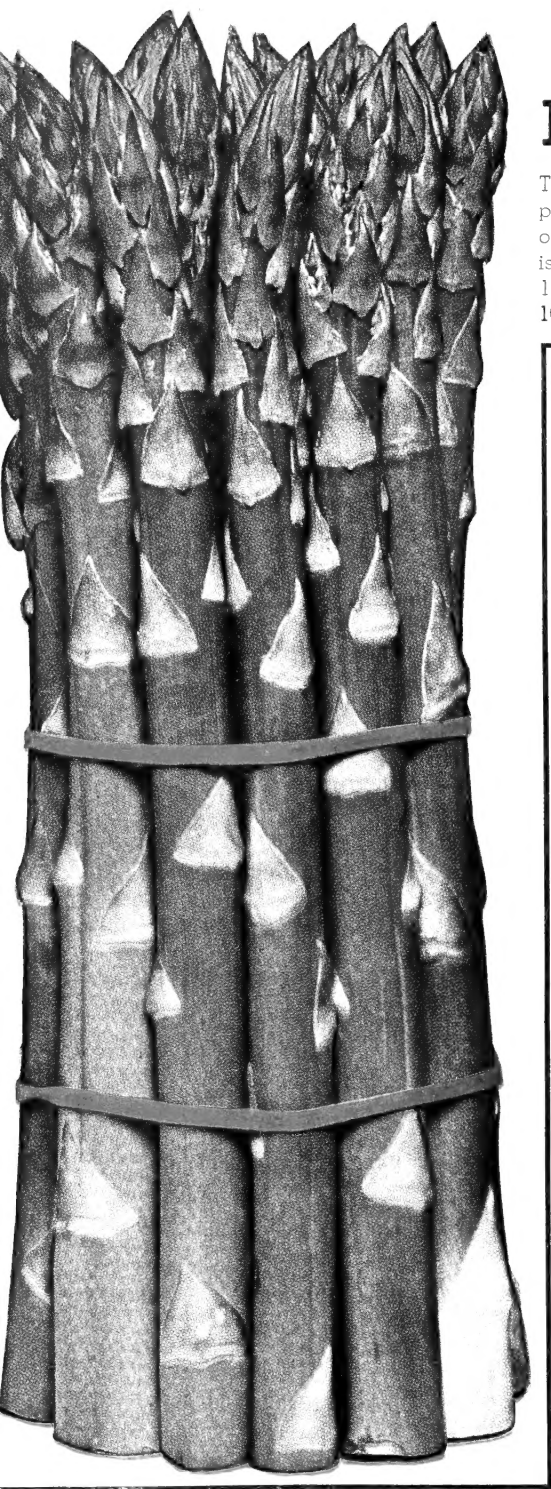

HARDY PECANS

A beautiful shade tree and at the same time a profitable one. Stahelin's Hardy Pecans can be grown anywhere excepting the far north, and will bear thin shelled nuts of large size and good quality. Grow to extreme height when fully matured. **PRICE:** 18-24 in. trees, .75c each; 3 for \$2.10; 10 for \$5.95. 2-3 ft. trees, \$1.25 each; 3 for \$3.50, 10 for \$10.95.

This year we offer Pecan trees that produce extremely large size paper shelled nuts. We offer them in three varieties—Stuart, Schley, and Success. These are budded trees, 2-3 ft. in height, and should not be grown north the central Indiana line. These are the three best paper shelled Pecans grown today. We reserve the right to substitute varieties if we should be out of the one ordered, due to the scarcity of these trees. **PRICE:** \$2.95 each; 2 for \$5.50; 5 for \$12.50.

HARDY HAZELNUTS

The Hazelnut trees which we offer this year are nursery grown stock, will be very well rooted, branched and will grow much better than the wild native Hazelnuts which are usually offered. Makes a fine, well branched shrub, 5 to 6 ft. tall and attractive enough to plant in your yard. In the fall the foliage is beautiful with scarlet and bronze leaves. The bush at that time will be completely covered with nuts. Will grow practically anywhere, and will produce huge crops. Bears very early. **PRICE:** 18-24 in. 2 Yr. branched trees, .85c each; 3 for \$2.40; 10 for \$6.95

Canada Red RHUBARB

The Canada Red Rhubarb which we list is of the Chipman strain which is regarded as the finest obtainable today. The chipman is large in size, very plump, and red throughout the entire stalk. It quickly forms large clumps. From 3 to 6 plants will furnish enough rhubarb for the entire family the year round. Very hardy and especially desirable for market growers.

Large divisions, 65c each, 10 for \$5.50.

Further prices and description on page 14.

Stahelin's Pedigreed PARADISE ASPARAGUS

The Paradise asparagus is today acknowledged as the finest asparagus grown for cutting purposes. We have gone to special pains to get the finest of pedigreed seed so as to offer our customers a superior type of asparagus. This variety is very easy to grow and when it is once planted is good for practically a lifetime. Every garden should have from 25 to 100 plants in same. 1 yr. plants, 25 for 85c; 100 for \$2.65; 2 yr. plants, 25 for \$1.60, 100 for \$4.50. Further description and prices on page 14.

MICHIGAN CERTIFIED QUALITY

Each bundle or package we ship contains or has attached a copy of our nursery inspection certificate. This is your assurance that we are operating and complying with government regulations. Our budwood is inspected each year showing that our stock is grown from virus disease free trees.

Red Lake CURRANT

The finest Red Currant today. Originating in the northwest it is very hardy and will grow almost anywhere. Ripens mid-season.

Bunches are large and very easily picked. Bush is thrifty and grows quite tall.

**PRICES: 1 YEAR NO. 1
PLANTS: 2 for 70c; 6 for
\$1.75; 25 for \$4.95; 50 for
\$8.25; 100 for \$14.95.**

Currants can be shipped to the following states only: Illinois, Michigan, Indiana, Kansas, Iowa, Missouri, Oklahoma, Nebraska, Texas, Colorado, Kentucky, North and South Dakota.
